NO.45 Which of the following are features of the S&OP process templates? Note: There are 2 correct Answers to this question.

- * The number of steps in a process template is the same for all implementations.
- * Each step depicted in the template can have tasks associated with it.
- * All process templates are assigned to dashboards.
- * New instances of templates allow for re-use of the same processes again.

NO.46 Analytics charts are created by the user in the Advanced Analytics application. What actions are possible in the Advanced Analytics app? Note: There are 2 correct Answers to this question.

- * Group data.
- * Merge charts together.
- * Open graphics in Excel.
- * Apply filters on your data.

NO.47 Which SAP IBP planning operator can be run to delete planning objects in a certain version?

- * Purge Key Figure Data

- * Purge Key Figure Data Outside Planning Area Planning Horizon
- * Purge Non-Confirming Data
- * Purge Master Data

NO.48 Where can we see the results of Time Series analysis in SAP IBP?

- * Time Series Property Attribute in Customer Source
- * Time Series Property Attribute in Customer Product
- * Time Series Property Attribute in Customer
- * Time Series Property Attribute in Product

NO.49 Which of the following configuration options are part of the new key figure creation process? Note:

There are 3 correct Answers to this question.

- * Hiding or displaying totals for the key figure
- * Enabling planning notes for the key figure
- * Setting permitted planning levels
- * Setting disaggregation logic for the key figure
- * Enabling fixing for the key figure

NO.50 Which header name displays are available in the Report Options menu of the SAP IBP Excel interface?

Note: There are 2 correct Answers to this question.

- * Changed member names that the user had created
- * Caption, as defined in configuration for the default name
- * Business meaning, as defined in configuration
- * Full unique name including the dimension and technical name

NO.51 Which calculations can be processed within the pre-processing step in the forecasting model? Note:

There are 2 correct Answers to this question.

- * Rounding can be executed for the sales history.
- * Missing Values can be substituted.
- * Promotion Sales Lift Ups can be deleted.
- * Correlations can be evaluated.

NO.52 You are configuring disaggregation for the KF1 key figure. Which methods can you apply? Note: There are 3 correct Answers to this question.

- * Disaggregation according to an equal split
- * Disaggregation in batch triggered by an application job
- * An internal system-generated disaggregation
- * Proportional disaggregation by using KF2 in the expression
- * Disaggregation according to a user-defined expression

NO.53 You need to create time periods for the time profile in a planning area. What should you be aware of when executing the Create Time Periods application job?

- * This application job cannot be scheduled for immediate start.
- * A time profile has to be activated so that the application job can proceed.
- * This application job can be run for multiple time profiles at once.
- * The planning area with this time profile must be activated so that the application job can proceed.

NO.54 How can you check if key figure is editable or non-editable?

- * Using the Web-based Planning app when selecting key figures
- * Using the Key Figure Calculations app
- * Using the Edit View and then the Edit Planning View option
- * Using the Analytics Advanced app when selecting key figures

NO.55 Which of the following data can be tracked using a change-history-enabled key figure? Note: There are 3 correct Answers to this question.

- * Reason code
- * Scenario ID
- * Attributes
- * Key figure type
- * Modified date

NO.56 You are creating advanced copy operators as part of an SAP IBP solution that is being implemented.

What do you need to be aware of when defining data transfer? Note: There are 2 correct Answers to this question.

- * Specifying target key figure is mandatory.
- * Specifying target key figure that is time independent is possible.
- * Specifying source key figure is mandatory.
- * Selecting by attribute with option '‘contain’ is possible.

NO.57 You are redesigning planning for supply chain that is facing the issue of variability. What is the best solution for dampening variability via demand classification?

- * SAP IBP for Demand
- * SAP IBP for Demand Driven Replenishment
- * SAP IBP for Inventory
- * SAP IBP for Sales and Operations Planning

NO.58 You are modeling a substitution scenario associated with a promotion. What are some of the Master Data parameters that you need to maintain to ensure desired results generated by the optimizer? Note: There are 2 correct Answers to this question.

- * Flag '‘Disable Substitution of Location Products
- * Loc-Prod Subst Valid-From Date
- * Promotion duration
- * Location Product Sub Cost Rate

NO.59 Which of the following key functions are supported by SAP IBP for sales and operations? Note: There are

2 correct Answers to this question.

- * Manual creation of feasible constrained plans
- * Finite resource planning
- * A basic demand planning process
- * An advanced demand planning process

NO.60 A time profile is defined with the levels of day, technical week, week, month, quarter, and year. What condition in configuration will allow you to have a different value in the current week, versus all other buckets?

- * IF(“PERIODID2”=”,\$\$PERIODID2CU\$\$…)
- * IF(“PERIODID5”=”,\$\$PERIODID5CU\$\$…)
- * IF(“PERIODID4”=”,\$\$PERIODID4CU\$\$…)
- * IF(“PERIODID3”=”,\$\$PERIODID3CU\$\$…)

NO.61 Which of the following key functions are supported by SAP IBP for sales and operations? Note: There are 2 correct Answers to this question.

- * Manual creation of feasible constrained plans
- * Finite resource planning
- * A basic demand planning process
- * An advanced demand planning process

NO.62 What does ABC/XYZ segmentation allow you to do? Note: There are 2 correct Answers to this question.

- * Assign more appropriate inventory algorithms to planning objects.
- * Tailor your forecast strategy and inventory optimization to segment characteristics.
- * Identify inventory items that require closer attention.
- * Analyze forecast accuracy by product class.

NO.63 You created a key figure and want to add calculations. Which of the following rules do you consider?

Note: There are 2 correct Answers to this question.

- * All key figure calculations have calculation inputs, which can be marked as stored or calculated.
- * The calculation chain for a key figure must always result in a calculated key figure.
- * Aggregation calculations using SUM or MAX functions must be based on a higher aggregation U level.
- * Key figures can be calculated across different planning levels.

NO.64 You are working to realign the data due to a recent warehouse closure. What should you be aware of in regards to configuration of realignment steps? Note: There are 2 correct Answers to this question.

- * The name of the realignment step should be no longer than 20 characters.
- * If a realignment step fails, subsequent steps are not processed.
- * The number of steps in realignment run is limited to 255.
- * The realignment step status must be set to In Review for it to be executed.

NO.65 SAP is transitioning IBP customers to the new process of export/import. What are some of the features of this new process?

Note: There are 2 correct Answers to this question.

- * You can choose to import only some of the items that were exported.
- * You can move a transported item from one collection to another.
- * You can create a collection of items and export it.
- * You can export from a planning area that is on a different release.

NO.66 You run a what-if analysis and use the scenario planning function. Which actions can you perform? Note:

There are 3 correct Answers to this question.

- * Run a scenario-specific inventory optimization job.
- * Share data with other users.
- * Run a scenario-specific demand sensing job.
- * Display data in analytics.
- * Change scenario-specific master data.

NO.67 Which of the following conditions are relevant for subtotals in the planning view? Note: There are 2 correct Answers to this question.

- * Only attribute-based totals can be added to the planning view.
- * The total value can be added before or after the selected attribute.
- * The values of the attribute-based total at the highest attribute level in the planning level can be changed.

* The total number of attributes that can use subtotals in the planning view can be restricted.
