Free C-IBP-2108 pdf Files With Updated and Accurate Dumps Training Top-Class C-IBP-2108 Question Answers Study Guide

SAP C-IBP-2108 Exam Description:

The "SAP Certified Application Associate - SAP IBP for Supply Chain (2108)" certification exam verifies that the candidate possesses the basic knowledge in the area of the SAP supply chain planning. This certificate proves that the candidate has a basic overall understanding within this consultant profile of the industry solutions, and can implement this knowledge practically in projects under guidance of an experienced consultant. It is recommended as an entry-level qualification to allow consultants to get acquainted with the fundamentals of SAP Integrated Business Planning. Please note that this 2105 version of the exam takes part in the Stay Current with SAP Global Certification program. Once you pass this version of the exam, make sure that you start your stay current process. You will be required to take the quarterly stay current assessment for all subsequent SAP IBP releases via the SAP Learning Hub starting with the 2108 release to maintain your SAP IBP consultant certification status and badge. In order to participate in the stay current program and access the stay current enablement and assessment, you will need at minimum an SAP Learning Hub, edition for IoT and Digital Supply Chain subscription. QUESTION 13

What actions can be performed in the Advanced Dashboards application? Note: There are 3 correct Answers to this question.

- * Rename the charts.
- * Add process templates.
- * Organize charts.
- * Display all assigned analytics on a single UI.
- * Link two analytics charts.

QUESTION 14

Which of the following data can be tracked using a change-history-enabled key figure? Note: There are 3 correct Answers to this question.

- * Reason code
- * Scenario ID
- * Attributes
- * Key figure type
- * Modified date

QUESTION 15

Which of the following modes can you use when creating a constrained plan? Note: There are 2 correct Answers to this question.

- * Profit maximization
- * Delivery maximization
- * Resource maximization
- * Production maximization

QUESTION 16

You are reviewing the master data types for supply planning. Which master data types are compound master data types? Note: There are 2 correct Answers to this question.

- * LOCATIONFR
- * SOURCELOCATION
- * SOURCECUSTOMER
- * SOURCEPRODUCTION

QUESTION 17

You created a key figure and want to add calculations. Which of the following rules do you consider?

Note: There are 2 correct Answers to this question.

- * All key figure calculations have calculation inputs, which can be marked as stored or calculated.
- * The calculation chain for a key figure must always result in a calculated key figure.
- * Aggregation calculations using SUM or MAX functions must be based on a higher aggregation level.
- * Key figures can be calculated across different planning levels.

QUESTION 18

What does ABC/XYZ segmentation allow you to do? Note: There are 2 correct Answers to this question.

- * Assign more appropriate inventory algorithms to planning objects.
- * Tailor your forecast strategy and inventory optimization to segment characteristics.

- * Identify inventory items that require closer attention.
- * Analyze forecast accuracy by product class.

QUESTION 19

You define fixing for a key figure. Which of the following functions are available for this key figure? Note:

There are 2 correct Answers to this question.

- * Fixing is possible for manually editable key figures.
- * Fixing is possible for a certain quantity of a key figure value.
- * Fixing is possible for a certain period, including all child values in the hierarchy.
- * Fixing is possible for system editable key figures.

QUESTION 20

You are modeling a substitution scenario associated with a promotion. What are some of the Master Data parameters that you need to maintain to ensure desired results generated by the optimizer? Note:

There are 2 correct Answers to this question.

- * Flag 'Disable Substitution of Location Products';
- * Loc-Prod Subst Valid-From Date
- * Promotion duration
- * Location Product Sub Cost Rate

QUESTION 21

Analytics charts are created by the user in the Advanced Analytics application. What actions are possible in the Advanced Analytics app? Note: There are 2 correct Answers to this question.

- * Group data.
- * Merge charts together.
- * Open graphics in Excel.
- * Apply filters on your data.

QUESTION 22

What are the ways to achieve rolling aggregation with SAP IBP?

- * Using attribute as a key figure
- * Using key figure calculation
- * Using local member
- * Using aggregation mode average

QUESTION 23

Which of the following conditions are relevant for subtotals in the planning view? Note: There are 2 correct Answers to this question.

- * Only attribute-based totals can be added to the planning view.
- * The total value can be added before or after the selected attribute.
- * The values of the attribute-based total at the highest attribute level in the planning level can be changed.
- * The total number of attributes that can use subtotals in the planning view can be restricted.

QUESTION 24

The Analytics Advanced app allows you to work with different types of charts. What can be the origin of the charts you can work with?

- * SAP IBP VBA Add-in template
- * Process Templates
- * Custom Alerts
- * Dashboards Advanced

QUESTION 25

You have set up infinite S&OP heuristics for unconstrained planning. What must you do to model inputs as constraints? Note: There are 2 correct Answers to this question.

- * Enter transportation lead times.
- * Model adjusted transport receipts.
- * Create product substitutions.
- * Set minimum and maximum lot sizes.

QUESTION 26

Which calculations can be processed within the pre-processing step in the forecasting model? Note:

There are 2 correct Answers to this question.

- * Rounding can be executed for the sales history.
- * Missing Values can be substituted.
- * Promotion Sales Lift Ups can be deleted.
- * Correlations can be evaluated.

QUESTION 27

Which of the following key functions are supported by SAP IBP for sales and operations? Note: There are

2 correct Answers to this question.

- * Manual creation of feasible constrained plans
- * Finite resource planning
- * A basic demand planning process
- * An advanced demand planning process

QUESTION 28

For which of the following application jobs can you enter planning filters as parameters? Note: There are

2 correct Answers to this question.

- * Purge Non-Conforming Data
- * Create Time Periods for Time Profiles
- * Purge Key Figure Data
- * Purge Master Data

QUESTION 29

You are working on a mid-range plan that spans the seasonal peak and you are evaluating the need for additional crewing. Which of the following parameters can you model to plan production with extra shift(s)?

- * Incremental production values
- * Capacity expansion with additional costs
- * Production source validity at the start of seasonal peak
- * Adjusted production interactive values

QUESTION 30

Which of the following solutions are feasible when using the time series supply optimizer? Note: There are 3 correct Answers to this question.

- * Violation of minimum aggregated inventory values
- * Not adhering to maximum transport values
- * Not-fully satisfied demands
- * Not respecting production capacity
- * Violation of minimum resource utilization

QUESTION 31

When you promote calculated and approved inventory parameters from SAP IBP for inventory, what other IBP modules can be receiving them? Note: There are 2 correct Answers to this question.

- * SAP IBP for sales and operations
- * SAP IBP for response and supply
- * SAP IBP for demand
- * DDMRP
