[Sep 15, 2022] Verified 1V0-21.20 dumps and 105 unique questions
1V0-21.20 Dumps for Pass Guaranteed - Pass 1V0-21.20 Exam 2022

Difficulty in Attempting Associate VMware Data Center Virtualization

One of the most important certifications that applicants may have on their resume is Professional VMware 1V0-21.20 certified. One of the key problems faced by most candidates is to choose the right research materials for their exam preparation since they use the internet to find too much data that makes it difficult for them to trust, which would be helpful for them.

Professional VMware 1V0-21.20 exam is not an easier one and can turn out to be a very difficult certification if not well prepared. If professionals give **VMWARE 1V0-21.20 practice exams**, they can better prepare for the exam while having understanding of the exam format and types of questions asked.

Applicants may, however, clear the exam with the right concentration and the right preparation material. DumpsMaterials have the most up-to-date learning materials, having a fair understanding of the question trend being asked in real certification with the help of these **VMWARE 1V0-21.20 practice exams** aspirants. For all of the changes in the course, the experts check DumpsMaterials **VMWARE 1V0-21.20 exam dumps**. DumpsMaterials also include practise testing, which proves to be an outstanding forum for testing the information gained. Refer to the links down below to access the study materials.

If Candidates feel any doubt in the SPLK-1003 practice test then our team is always there to help them. **VMWARE 1V0-21.20 practice exams** and **VMWARE 1V0-21.20 practice exam** are the perfect way to prepare SPLK-1003 exam with good grades in the just first attempt. So, Candidates want instant success in the SPLK-1003 exam with quality SPLK-1003 training material then

DumpsMaterials is the best option for them because our management is well trained in it and we update each question of all exams on regular basis after consulting recent updates with our Splunk certified professionals.

NEW QUESTION 21

An administrator has applied a Service 2 patch after taking a snapshot. The administrator then realizes that a Service 1.5 patch should have been applied before the Service 2 patch.

Refer to the exhibit:

Which series of actions should be taken to manage this issue?

- * Delete all the snapshots, take a snapshot, and apply Service 1.5 patch.
- * Remain at Service 2, take a snapshot, and apply Service 1.5 patch.
- * Delete Service 1, take a snapshot, and apply Service 1.5 patch.
- * Revert to Service 1, take a snapshot, and apply Service 1.5 patch.

NEW QUESTION 22

An administrator need to migrate a powered off virtual machine to

another cluster with no shared storage.

Which option should the administrator select for a successful migration?

- * Change storage only
- * Migrate virtual machines(s) to a specific datacenter
- * Change computer resource only
- * Change both compute resource and storage

NEW QUESTION 23

Which DRS score indicates that the virtual machine (VM) is experiencing severe resource contention?

- * 50%
- * 95%
- * 70%
- * 15%

NEW QUESTION 24

Which problem is solved by migrating virtual machines (VMs) using vSphere vMotion?

- * A vSphere cluster that needs to be upgraded without any VM downtime.
- * A problem that occurred during VM patching and a roll-back is needed.
- * The names of the VM files that do not match the inventory name of the VM.
- * Heavy storage traffic and latency that are concentrated in a few datastores.

NEW QUESTION 25

Which configuration setting ensures that virtual networks on a virtual switch are isolated from each other?

- * Port ID
- * Network Label
- * Security Policy
- * VLAN ID

NEW QUESTION 26

An administrator notices a virtual machine named vm01 is missing

from the inventory, but the configuration files can be located.

Which file should the administrator click on to register the VM?

- * vm01.vmdk
- * vm01.vmsd
- * vm01.vmx
- * vm01.nvram

NEW QUESTION 27

An administrator has configured a Linux virtual machine and found

that it does not have network connectivity. The administrator notices this when trying to ping the default gate way and nothing comes back. The administrator needs to verify that the guest operating system is configured properly.

What is the first step that the administrator should take to meet this goal?

- * Ping an outside source to see if you get a response
- * Verify that VMware Tools has been loaded on the guest operating

system

- * Check that the virtual network adapter is present and enabled
- * Confirm the link status of the virtual switch

NEW QUESTION 28

Which file system protocol is supported by vSphere?

- * NFS
- * iSCSI
- * SAN

- * vSAN

NEW QUESTION 29

Which hypervisor is a type-1 hypervisor?

- * Oracle VM VirtualBox
- * VMware ESXi
- * VMware Fusion
- * VMware Workstation

NEW QUESTION 30

A system administrator needs to configure a virtual machine to

guarantee that it always gets the appropriate resource even if the host is overloaded and overcommitted.

Which setting on the virtual machine does the administrator need to

configure?

- * vSphere High Availability Admission Control
- * CPU and Memory Shares to High
- * CPU and Memory Reservations
- * High Performance Power Policy

NEW QUESTION 31

Which two characteristics describe vSphere HA?

- * vSphere HA restarts VMs if their host becomes isolated in the

management network.

- * In response to datastore accessibility failures, vSphere HA restarts VMs on unaffected hosts.
- * vSphere HA performs load balancing across the hosts in a cluster to

prevent resource contention

- * By keeping a secondary VM running at all times, vSphere HA

protects VMs from data loss.

- * When vCenter Server experiences downtime, vSphere HA restarts VMs on unaffected hosts.

NEW QUESTION 32

An administrator would like to enable a switch setting to restrict the network bandwidth that is available to ports, but the solution must also allow bursts of traffic to flow through at higher speeds. Which vSphere Distributed Switch setting accomplishes this goal?

- * Monitoring
- * Security
- * Traffic shaping
- * Teaming and failover

NEW QUESTION 33

An administrator needs to upgrade the guest operating system installed in a virtual machine. The administrator wants to safely ensure that the selected operating system is supported by ESXi. Which action should the administrator take to meet this goal?

- * Perform a guest OS and product search In the VMware Compatibility Guide.
- * Look in the guest OS version drop-down menu of the VM.
- * Snapshot the VM before performing the operating system upgrade.
- * Check the web page of the guest operating system vendor.

NEW QUESTION 34

A vSphere administrator has multiple virtual machines running on a VMFS datastore.

Which setting prioritizes the disk access for the virtual machines?

- * Disk Shares
- * Disk type
- * Disk Mode
- * Hard disk

NEW QUESTION 35

A vSphere administrator needs to create an exact replica of a virtual machine as a safeguard prior to changing the virtual machine configuration.

Which vSphere feature accomplishes this requirement?

- * vSphere Fault Tolerance
- * vSphere vMotion
- * Cloning
- * Snapshots
