* Setup a scheduled Apex batch job.
* Use the CMS recalculation API
* Use a third party API to recalculate CMS risk score
* Setup a Apex batch job and run the job manually
* Create a Healthcare Provider enrollment flow.

Reference and details below.

Calculate Referral Scores

Calculate referral scores with a batch Apex job.

Referral scores are based on the Total Referrals and Converted Referrals fields on the referring practitioner contact record. The calculated score appears in the Referrer Score field.

Use the scheduled job class name: `HcReferrerScoreScheduledJob`. To invoke Apex classes to run at specific times, first implement the `Schedulable` interface for the class. Then, schedule an instance of the class to run at a specific time using the `System.schedule` method

👁 **Example** Turn the `HcCMSRiskScoringScheduledJob` class once, select **Debug | Open Execute Anonymous Window**. Enter the following text in the Enter Apex Code window in Developer Console.

```
// scheduled job sample
int batchSize = 200;
SchedulableContext sc = null;
HcReferrerScoreScheduledJob scheduledJob = new HcReferrerScoreScheduledJob(batchSize);
scheduledJob.execute(sc);
```
