# [Q34-Q58 Real Oracle 1z0-1080-22 Exam Questions [Updated 2022

Real Oracle 1z0-1080-22 Exam Questions [Updated 2022]

1z0-1080-22 Exam Dumps Pass with Updated 2022 Oracle Planning 2022 Implementation Professional

QUESTION 34

Which three accounts in Workforce leverage the Component dimension for driver and trend-based calculations? (Choose three.)

* Revenue
* Balance Sheet
* Expense
* Cash Flow

QUESTION 35

Which two methods can be used to push data between cubes? (Choose two.)

* Data Management
* Import Data
* Data Maps
* Copy Data

QUESTION 36

A company has enabled Financials and now would like to make changes to the initial configuration. Which three changes can be made? (Choose three.)

* Enabling Expense
* Enabling Income Statement
* Disabling already enabled features
* Adding custom dimensions
* Enabling Rolling Forecast
* Removing custom dimensions

QUESTION 37

Which two tasks can be scheduled as a job in Planning? (Choose two.)

* Import or export data
* Create snapshots
* Promote a Planning Unit
* Execute Data Maps

QUESTION 38

Which two clients or command line tools can you download from Planning? (Choose two.)

* Data Management
* EPM Automate
* Strategic Modeling Smart View add-on
* Calculation Manager

QUESTION 39

After loading Workforce data from external systems, which statement describes actions you can take to make adjustments to loaded data and then calculate compensation expenses? Choose the best answer.

* In Workforce, change properties such as salary grade and FTE, and then calculate salary, benefits, additional earnings, and taxes based on assumptions in Planning.
* Change loaded salary information in Workforce and then run the data map for Compensation Data to calculate the updated benefits.
* Change loaded benefit information in Workforce such as options for medical benefits and then launch the compensation data business rule to calculate the updated benefit data.
* In Workforce, if you change both the selected benefit option and the rate, when compensation expenses are calculated, the value will be based on the benefit option’s default value.

QUESTION 40

Which option is true when implementing access permissions in Planning? (Choose the best answer.)

* Users and groups are restricted from accessing applications by removing custom application and plan-type security
* A member that is set to read that has a parent with write access to all descendants will result in an access level of read
* Planning roles can be assigned to members in all dimensions in all modules in the application

QUESTION 41

Which three metadata artifacts can be exported to a flat file? (Choose three.)
* Exchange Rate Tables
* Dimensions
* Smart Lists
* Linked Reporting Objects
* Data Entry Forms

QUESTION 42

In order to set up weekly planning for a continuous 18 months, which three options would need to be selected when initially configuring Financials? (Choose three.)
* Rolling Forecast
* Custom Periods
* Weeks to months mapping
* Plan Element dimension
* Weekly Planning

QUESTION 43

What would be the recommended module-based cube architecture for a company wanting to enable Financials and Capital, as well as create a Detailed Sales Forecasting cube with complex allocations and calculations, corresponding sales reporting cube, and consolidated reporting cube? (Choose the best answer.)
* 3 BSO cubes (1 required for the modules +2 custom BSO cubes), 2 ASO cubes
* 2 BSO cubes (1 required for the modules +1 custom BSO cubes), 2 ASO cubes
* 3 custom BSO cubes, 2 ASO cubes
* 3 BSO cubes (2 required for the modules +1 custom BSO cube), 2 ASO cubes

QUESTION 44

Which two statements are true regarding the creation and management of business rules in module-based Planning? (Choose two.)
* Pre-defined business rules for modules may be modified, but may be ignored after an application upgrade.
* Custom business rules for modules can only be created using the graphical designer.
* Custom business rules can be created for each module.
* Modules cannot use regular business rules. Instead, they must be scripted using Groovy.

QUESTION 45

Which three describe what you can do with Valid Intersections? (Choose three.)
* specify that certain programs are valid only for some periods or departments.
* restrict cells containing invalid data, setting them to a read-only state within forms.
* filter cell intersections to users when they enter data or select runtime prompts
* prevent the user from executing any type of Calculation Manager rule that uses runtime prompts
* allow all users to select from a non-filtered list of members on the form’s point of view

QUESTION 46

What are four types of values that can be used in business rule run-time prompts? (Choose four.)
* String
* Substitution Variables
* Member or members

* Integer
* Date as Number
* Smart Lists

QUESTION 47

What are the two primary use cases for an ASO reporting cube? (Choose two.)
* You want to create and execute Calculation Manager business rules
* You want to report on Smart Lists in Planning, which you can’t do in Planning
* You want to report on new Planning data originating from any source, such as a data warehouse
* You want to create, maintain, and report on Attribute dimensions

QUESTION 48

Which statement describes infolets? Choose the best answer.
* Infolets help you personalize focused data slices that you frequently use for analysis.
* Infolets help you quickly analyze data and understand key business questionss by presenting a visual overview of high-level, aggregated information.
* Infolets are predefined dashboards that give you insight into overall project financials and expense and revenue metrics.
* Infolets help you organize, track, and prioritize your workload.

QUESTION 49

What three tasks can you perform in the Data Management Workbench? (Choose three.)
* Export
* Validate
* Maintain Process Tables
* Import
* Delete Integration
Reference:

using_the_data_load_workbench.html

QUESTION 50

What does a navigation flow allow you to do? Choose the best answer.
* Promote a plan to your supervisor
* Display report variances by geography
* Run multiple business rules in a predetermined sequence
* Customize the clusters and cards that a user can access
The Navigation Flow Designer enables you to customize the business process interface. For example, you can change the names of the cards and clusters that display.

QUESTION 51

If the HSP_VIEW dimension exists in the cube, what feature has been enabled? (Choose the best answer.)
* Rolling Forecast
* Intercompany Eliminations
* Multicurrency
* Sandboxes

When a cube is enabled for sandboxes, the HSP_View dimension is created.

QUESTION 52

What two form validation rules options are supported in Planning? (Choose two.)
* When enabled, execute validations associated with the form for all users regardless of access rights when validating the Approval unit.
* When enabled, all validations are run as the administrator and applied to the form members.
* When enabled, the user variable for the approval dimension on the form will be replaced by the approval unit member before the validations are run.
* When enabled, the system figures out which page combinations have potential data blocks and runs the validations regardless of those page combinations.
* When enabled, the form will be validated multiple times by replacing the user variable from the approval unit dimension with every possible value.

QUESTION 53

What three actions can you perform on the data displayed in the Data Integration Workbench? (Choose three.)
* Re-register or modify the data source system
* Open loaded data in Microsoft Excel
* Apply a filter using Equal and a specific value
* Apply a filter using Contains and a specific value
* Drill-through to source from specified data cells

QUESTION 54

Which three are benefits of using EPM Enterprise Cloud Service over EPM Standard Cloud Service? (Choose three.)
* enable preseeded configurable content including dimensions, models, forms, rules, dashboards, infolets, and reports for Strategic Modeling
* with Free Form Planning, deploy Planning business processes with no dimension requirements and create business processes using Essbase outline files
* Custom Planning, which allows a high degree of business process customization to support business requirements
* use of the Groovy scripting language to create or customize business rules
* deploy more than one supported business process in the same instance

QUESTION 55

Several users continuously use custom-created formulas in Excel to supplement their Planning form inputs.

What is another design alternative to reduce offline Excel maintenance? Choose the best answer.
* Cell commentary
* Reports
* Ad hoc forms
* Smart forms
* Smart push

QUESTION 56

Which three can be automated with EPMAutomate? (Choose three.)
* Import user security

* Run a Business Rule
* Import a file into the Planning inbox
* Migrate a backup between test and production
* Send an email to users

QUESTION 57

Which two are benefits of enabling Use Database Suppression in Smart Push? (Choose two.)
* It automatically merges comments, attachments, and supporting detail when mapping a cube for reporting.
* It helps eliminate the impact on query thresholds and improving wait times.
* It allows you to continue using the application while Smart Push runs in the background.
* It enables you to apply row suppression at the database level instead of the application level.

QUESTION 58

Which migration category is required to restore dimensional security? (Choose the best answer.)
* Planning
* Groups and Memberships
* Reporting
* Calculation Manager

Oracle 1z0-1080-22 Exam Syllabus Topics:

TopicDetailsTopic 1- Back up and migrate data and metadata- Identify metadata and data load optionsTopic 2- Monitor Planning maintenance and upgrades- Design forms, dashboards, and infoletsTopic 3- Explain required and user-defined dimensions; how dimension hierarchies impact Planning- Set up and deploy a machine learning modelTopic 4- Assign access permissions to artifacts and cells in Planning- Update Multiple Employee and Job DetailsTopic 5- Set up valid and invalid intersections and cell-level security- Import and export data into PlanningTopic 6- Create Reports with Financial Reporting Web Studio- Leverage Best Practices for Module PlanningTopic 7- Import and export metadata into Planning- Create and manage navigation flowsTopic 8- Introduction to Strategic Modeling- Manage Planning with EPM Automate- Create and run data integrationsTopic 9- Create Reports with New Reports Designer- Configure Intelligent Performance Management (IPM)
