Based on Official Syllabus Topics of Actual SAP C_SACP_2208 Exam Free C_SACP_2208 Dumps are Available for Instant Access

SAP C_SACP_2208 Exam Syllabus Topics:

TopicDetailsTopic 1- Build SAP S- 4HANA Finance for group reporting, and SAP BW imports and exports- Forecasting, collaboration, and process controlTopic 2- Design and build hybrid planning solutions with SAP BPC, build analytic applications- Configure, use, and schedule data actions and allocationsTopic 3- SAP BPC Integration, Analytic Applications, and Microsoft Excel Integration- Data actions and allocation processes

Q56. You need to plan with finance data from SAP S/4HANA in SAP Analytics Cloud. To get started, you need to import master data from SAP S/4HANA. You are following the steps recommended by SAP. From which

source can you import master data from SAP S/4HANA?

- * CDS View
- * Dataset

- * Infoset
- * Calculation View

Q57. What data sources are available for SAP Analysis, Edition for Microsoft Office? Note: There are 2 correct answers to this question.

- * SAP HANA for Group Reporting
- * SAP HANA
- * SAP Analytics Cloud
- * SAP Business Objects Universe

Q58. When you enable currency translation for a planning model with an account dimension which object is added to the model automatically?

- * Rate type property
- * Currency property
- * Currency dimension

Q59. You want to rebuild an SAP Analytics Cloud classic planning model but the Rebuild Model button is inactive.

Why might this happen? Note: There are 2 correct answers to this question.

- * A public version is used in the model
- * A private version is used in the model
- * Currency conversion is enabled
- * Data exists in the model

Q60. Using a live connection in SAP Analytics Cloud, for which system can you change plan data?

- * SAP BPC Embedded
- * SAP S/4HANA
- * SAP BPC Estandar

Q61. You have a model in SAP BPC, version for SAP BW/4HANA Standard option that contains data records in

both local currency and group currency. When you create the corresponding planning model in SAP Analytics

Cloud, you set the Currency Conversion setting to On. How does this impact the planning model? Note: There

are 2 correct answers to this question.

- * Currencies are determined from the entity dimension
- * Currencies are determined from the currency dimension
- * Local currency and group currency are imported
- * Local currency is imported

Q62. You need to schedule the import master data for the profit center, cost center, account dimensions as well as

the transaction data. Each dimension has members, text, attributes and a hierarchy. When importing from SAP

Business Warehouse. How many import steps do you need?

- * 4
- * 10

* 13

Q63. You are using the planning panel to distribute values. Which of the following driver options can you select?

Note: There are 3 correct answers to this question.

- * Proportionate
- * Equal
- * Overwrite
- * User defined
- * Append

Q64. Which of the following properties does a CommentInfo object in an analytical contain? Note: There are 3

correct answers to this question

- * The comment text
- * The comment technical ID
- * The comment Length
- * The change history
- * The number of likes

Q65. What can you do in an analytic application?

- * Enter form-based comments
- * Trigger input tasks.
- * Read data from write-back models

Q66. You have an SAP Business Warehouse data source with 25 key figures and no account characteristic. What

must you do to import this data into an existing planning model? Note: There are 2 correct answers to this

question.

- * Map the key figures to the measures card during the import.
- * Include 25 accounts in the planning model.
- * Include 25 value columns in the planning model.
- * Map the key figures to the account card during the import.

Q67. What master data can you update during the import of transaction data into an SAP Analytics Cloud planning

model with private and public dimensions?

- * Hierarchies for public dimensions
- * Property values for public dimensions
- * Property values for private dimensions

Q68. You enter the following code into the formula script editor: `MEMBERSET[d/Account]=` What does the

auto-complete feature return? Note: There are 2 correct answers to this question.

- * Hierachies
- * Members
- * Properties
- * Parameters

Q69. Which hierarchy types are supported in an SAP Analytics Cloud dimension?

- * Version Dependant
- * Time Dependant
- * Story Specific
- * Level based

Q70. You have a planning model with the following dimensions: Cost Center, Account, Date, Version. When you

add new transactional data to your model, you want to add new data for cost center A and remove any records

for cost center B. Which import method do you use?

- * Update
- * Append
- * Clean and replace selected version data

Q71. You want to import group reporting data to an SAP Analytics Cloud planning model. What source table must

you use?

- * ACDOCP
- * ACDOCU
- * ACDOCC
- * ACDOCA

Q72. You have a planning model with the following dimensions; Account, Product, Profit Center, Date, and

Version. In a story, which new master data can you add on the fly? Note: There are 2 correct answers to this

question.

- * Profit Center property value
- * Hierarchy Node
- * Product Member
- * Account Member

Q73. You imported a transaction data file into an empty model with the results as shown in Figure A. Later, a

member of the finance team wants you to import a new data file. In the new data file, you find the following

differences: The value of the Labor account has increased to 1600. There is a new record for the Services

account, with a value of 250. The record for the Travel account has been deleted. To achieve the result shown

in Figure B, which option must you use to update the data?

- * Clean and replace selected version data
- * Append: Reject duplicated rows in model
- * Clean and replace subset of data with Scope = Version and Account
- * Update

Q74. In a rolling forecast table, what can be used to determine the date to cut over to plan data?

- * Look back x number of months
- * Last actual value

- * Look ahead x number of months
- * Current date with an offset

Q75. What are the pillars of SAP Analytics Cloud? Note: There are 3 correct answers to this question.

- * Predictive
- * Planning
- * Data Warehousing
- * Blockchain Management
- * Business Intelligence

Q76. In an analytic application you want to use a data action trigger. Your customer complains that the data action

trigger pushbutton is too large. How can you address this complaint?

- * Use a button to run a data action
- * Resize the data action trigger in the builder pane
- * Add a cascading style sheet to the data action trigger

Q77. You want to import data from SAP BPC Standard. Which SAP Analytics Cloud planning model types can you

use? Note: There are 2 correct answers to this question.

- * Write-back
- * Financial
- * Basic
- * Generic

Q78. What can you do with a data action trigger in an analytic application? Note: There are 2 correct answers to this

question

- * Use the onBeforeExecute event
- * Use the onAfterExecute event
- * Execute the data action trigger at runtime
- * Execute the data action trigger at design time
