# Latest Success Metrics For Actual H13-531_V2.0 Exam (Updated 827 Questions) [Q14-Q34

Latest Success Metrics For Actual H13-531_V2.0 Exam (Updated 827 Questions) Genuine H13-531_V2.0 Exam Dumps Free Demo Valid QA's NO.14 In the ManageOne operation plane, VDC supports the management of multiple regions and AZs, and supports the application of resources across regions for the same project.

* True
* False

NO.15 In the HUAWEI Desktop Cloud system, which of the following steps are involved in the rapid provisioning of linked-clone VMs? (Multiple choice)

* Join the virtual machine to the domain
* Rename the virtual machine
* Create a virtual machine
* The virtual machine is associated with a user/user group

NO.16 Which of the following statements are correct regarding the difference between a domain and an organizational unit OU?

(Multiple choice)
* Both OUs and domains can set Group Policy.
* OUs can exist in domains, and domains can also be in OUs.
* Both OUs and domains can hold AD objects.
* The user is only logged in to the domain, not the OU

NO.17 What are the mandatory components of FusionAccess system? (Multiple choice)
* HDC
* ITA
* LIC
* TCM

NO.18 Which of the following topology viewing methods is not supported by Manage One Operation Center?
* Physical Location Topology
* VDC topology
* Service Application Topology
* VPC topology

NO.19 In Huawei Desktop Cloud, what are the main factors affecting VM density? (Multiple choice)
* Server Load
* Memory size
* QoS
* Load Balancing

NO.20 A service virtual machine in FusionCompute cannot communicate with the outside world. It may be that a security group with wrong rules has been added to it.
* TURE
* FALSE

NO.21 Which of the following descriptions are correct about the disk configuration mode of the virtual machine system disk when the Huawei desktop cloud system is rapidly provisioned? (Multiple choice)
* When the virtual machine template is a complete copy template, the configuration mode must be normal,
* When the virtual machine template is a full clone template, the configuration mode must be thin.
* When the storage resource type is FusionStorage, the configuration mode must be simplified.
* When the virtual machine template is an express package template, the configuration mode must be thin.

NO.22 Which of the following KVM images are supported on Fusionsphere Openstack OM? (Multiple choice)
* raw
* qcow2
* vhd
* iso

NO.23 ManageOne OperationCenter supports the SSO function. Through the interaction between the SSO Server and FusionSphere OpenStack OM, you can log in by entering the account and password of ManageOne OperationCenter on the login interface of FusionSphere OpenStack OM.
* TRUE
* FALSE

NO.24 Which of the following descriptions are correct about the time-setting specifications and images for applying for an ECS in Fusioncloud? (Multiple choice)

* The size of the ECS system disk must be smaller than the minimum disk requirements for images.
* The size of the elastic cloud server system disk must be greater than or equal to the minimum disk requirement of the image.
* The size of the ECS must be greater than or equal to the minimum vCPU memory required in the image
* The size of the ECS should be smaller than the minimum vCPU memory required in the image

NO.25 Which indicators of service virtual machines are not supported by FusionCompute?
* Disk 10
* Virtual machine NMA structure
* CPU usage
* Network Throughput

NO.26 The port configuration of a Huawei switch is as follows:

Interface XGigabitEthernet0/0/4

Port link-type trunk

Port trunk allow-pass vlan 16 17

Based on the above configuration, which of the following descriptions is correct?
* When the data frame without any label passes through the port, it will be tagged with vlan 16 or vlan 17 and forwarded.
* Data frames that do not contain any tags will be discarded when passing through this port.
* The data frame containing the vlan 16 label will be stripped of the label and forwarded when passing through the port.
* The data frame containing the vlan 17 label will retain the label and be forwarded when passing through the port.

NO.27 What is incorrect about the description of configuring the virtualized environment in FusionAccess?
* When connecting to FusionCompute, you need to enter the FusionCompute management plane address.
* The communication protocol between FusionCompute and ITA is safer to use https.
* The virtualization type can choose FusionCompute or VMWare
* When connecting to FusionCompute, use the default vdisysman account.

NO.28 Which of the following descriptions about the memory usage of physical hosts and virtual machines in FusionCompute are correct? (Multiple choice)
* On the same physical host, all the Guest Physical Memory can be larger than the Host Physical Memory of the physical host
* On the same physical host, all Guest Physical Memory must be less than or equal to the Host Physical Memory of the physical host
* In a virtual machine, the Guest virtual memory corresponding to all applications can be larger than the Guest Physical Memory of the virtual machine
* Already in a virtual machine, the Guest Virtual Memory corresponding to all applications must be less than or equal to the Guest Physical Memory of the virtual machine

NO.29 The Huawei desktop cloud system can manually or automatically monitor the resource load and shut down unused virtual machines.
* TRUE
* FALSE

NO.30 Regarding the branch office desktop cloud scenario, which of the following descriptions is incorrect?
* The business resources of branch offices are deployed locally, and the remote desktop traffic of virtual machines is also restricted locally.
* If the headquarters data center fails or the network with the branch office is interrupted, the local users of the branch office cannot

access the local virtual desktops.
* The network between the branch office and the headquarters is only used to transmit management data, which requires less network bandwidth.
* Deploy a centralized operation and maintenance management system at the headquarters to centrally operate, maintain and manage the desktop cloud services of the headquarters and branches.

NO.31 After the user is authenticated, he can see the list of virtual machines. What components are involved in this process? (Multiple choice)
* WI
* GaussDB
* HDC
* ITA

NO.32 Which of the following descriptions about FusionCompute clusters, hosts and virtual machines is incorrect?
* Whether multiple hosts belong to the same cluster depends on whether they use the same shared storage.
* Hosts can be moved between different clusters.
* Virtual machines can be migrated across clusters.
* A cluster is composed of multiple hosts and their associated storage and network resources.

NO.33 Regarding the operation of adding virtual machines, which of the following descriptions is incorrect?
* When assigning a virtual machine, you do not need to configure the user and permission information of the virtual machine.
* After the virtual machine is created, you need to assign the virtual machine to the desktop group so that users can use the virtual machine.
* When adding a virtual machine to a complete copy virtual machine group, you can adjust the parameters of the virtual machine, while the linked clone virtual machine group can only add virtual machines with the same parameters as the original virtual machine.
* First of all, you need to add a virtual machine to the planned unit to create a virtual machine.

NO.34 In FusionCompute, for which object does the VLAN pool provide VLAN resources?
* Virtual machine
* Port Group
* Virtual NIC
* Uplink
