

(Nov-2022) Latest 1z0-1042-22 Dumps for Success in Actual Oracle Certified [Q73-Q90]

(Nov-2022) Latest 1z0-1042-22 Dumps for Success in Actual Oracle Certified
Changing the Concept of 1z0-1042-22 Exam Preparation 2022

NO.73 In Oracle Integration Cloud (OIC) Process, you can configure a human task that enable you to model approval task interactions.

What are the available options when configuring the Escalation and Expiration tab of human task?

- * Expire, Reset, Escalate
- * Expire, Escalate, Skip, Reset
- * Never Expire, Expire, Renew, Escalate
- * Never Expire, Expire, Never Escalate, Escalate

NO.74 To use Integration Insight to map milestones to actions in an Oracle Integration Cloud(OIC), business process implementation, certain Which is not a valid consideration for models and mapping milestones?

- * The model must be in Draft state in order to map a milestone to an integration action.
- * A business process implementation can be mapped to milestones within only one model.
- * Milestones in a single model can be mapped to a multiple business processes.

- * Extraction criteria for the instance unique identifier is defined with an Xpath extension.
- * Extraction criteria for the milestone indicator is defined with an Xpath expression.

Explanation

<https://docs.oracle.com/en/cloud/paas/integration-cloud/user-int-insight-oci/prerequisites-mapping-milestones.ht>

NO.75 OIC is available in two editions – Standard and Enterprise.

Which OIC Enterprise Edition capabilities are ALSO available in the OIC Standard edition?(Select two)

- * Process Applications
- * B2B Trading Partner Agreements
- * Enterprise application Adapters (such as EBS, JDE, SAP, and Siebel)
- * Integration Insight
- * File server
- * Visual Builder

NO.76 Which three are created and managed using the Integration page in Process Cloud Service (PCS)?

- * ICS Integrations
- * Java Cloud Services
- * Rest Connectors
- * WebService Connectors

NO.77 You are developing orchestration-style integrations in the OIC Designer Portal and have discovered that the Outline View is not available in your OIC instance environment.

What is the name of the feature flag you will need to request to be enabled by raising a Service Request from My Oracle Support?

- * oic.console.integration.outlineview
- * oic.ics.console.integration.layout
- * oic.console.integration.outline
- * oic.console.integration.pseudoview1

NO.78 Which three are types of certificates that can be imported from Settings?

- * Identity Certificate
- * Multi Domain SSL Certificate
- * Trust Certificate
- * Message Protection Certificate
- * Unified Communications Certificate

NO.79 Which two types of authentication mechanisms are available for Service Account configurations in API Platform Cloud Service?

- * WSS Username Token
- * SAML
- * OAuth credentials
- * Basic Authentication
- * Kerberos

NO.80 Which three Service-Oriented Architecture Cloud Service (SOA CS) Components can route a message to an end point?

- * Oracle Mediator
- * OracleBusiness Rules
- * Oracle BPEL Process Manager

* Oracle Service Bus

Explanation

<https://docs.oracle.com/en/cloud/paas/soa-cloud/csbc/components-oracle-soa-cloud-service.html>

NO.81 What Expression Language does Decision Modeling and Notation (DMN) use?

- * RegEx
- * Groovy
- * Friendly Enough Expression Language (FEEL)
- * Process Expression Language (PEL)

Explanation

<https://docs.oracle.com/en/cloud/paas/process-cloud/user/understanding-feel-friendly-enough-expression-languag> Decision Modeling and Notation (DMN) defines Friendly Enough Expression Language (FEEL) to provide standard executable semantics to all expressions used within a decision model.

In Process, you use FEEL to define expressions within all notations of decision logic, including decision tables.

NO.82 Which two statements are true about Internet of Things (IoT)?

- * Different IOT approaches need to be established integrate different technologies such as mobile, cloud, big data, and analytics, and connects everyday objects to each other and to the Internet.
- * Cloud technology is well suited to enable IoT, offering high degrees of agility, low and flexible costs, and excellent resource utilization.
- * Using IoT, hospitality-based businesses can better track customer behavior and preferences to deliver rewards and more tailored services that differentiate their businesses.
- * IOT is not useful in asset tracking scenarios because there is an unavailability of low-cost connected devices and sensors that can be embedded into all of the various assets that need tracking.

Explanation

<https://www.oracle.com/assets/oracle-iot-solution-brief-2632911-es.pdf>

NO.83 What is the Decision Table in Business Rules in Process Cloud Service?

- * a range value set in a spreadsheet-like format that defines a list of allowed value ranges for the input and output data objects of a decision
- * a decision matrix that organizes if/then rules into a spreadsheet-like format, where rows represent conditions and actions, and columns match condition values to action alternatives
- * an if/then rule that has one or more conditions (if statements) that together are true or false, and one or more actions (then statements) that are applied if the conditions are true
- * a value set in a spreadsheet-like format that defines a list of allowed values for the input and output data objects of a decision

NO.84 You are tasked with provisioning a Managed File Transfer(MFT) Cloud Service on Oracle Cloud Infrastructure (OCI).

Which statement is valid concerning MFT provisioning?

- * Defining virtual machines(compute nodes) for the weblogic cluster if no longer needed
- * You must include the B2B cluster configuration since the MFT service runs with B2B document
- * Because MFT requires an Oracle ATP database, the database instance must be provisioned in OIC
- * MFT requires creating an Oracle SOA Cloud Service instance and choosing MFT cluster as service type.

Explanation

<https://docs.oracle.com/cloud-machine/latest/managed-file-transfer-cloud/MFTCS/GUID-6C8673D8-C3DD-4B6>

NO.85 Which three statements are true about SOAP and the advantages it provides?

- * As compared to RPC (remote procedure calls), which are sometimes blocked by firewalls and proxy servers, SOAP over HTTP can overcome that limitation.
- * It provides flexibility for message format flexibility allowing for loose coupling between client and server.
- * It commonly serves as a cleaning agent to remove excess data from the transmission protocol.
- * It leverages XML based payloads to communicate between two client machines across any modern network.
- * It is platform and programming language independent.
- * SOAP clients can easily hold stateful references to remote server-side SOAP objects.

NO.86 Which three are characteristics of Device Virtualization?

- * Oracle Internet of Things (IoT) Cloud Service does not support Device Virtualization.
- * You can monitor each device endpoint's health, performance, and location via the client software library API or with REST calls made to those devices.
- * You can collect data from your devices using APIs delivered with Oracle Internet of Things (IoT) Cloud Service Client Software Libraries or Oracle IoT Cloud Service Gateway.
- * The APIs provided enable you to send telemetry messages and device data from your devices to Oracle Internet of Things (IoT) Cloud Service, control your devices, and deploy applications to your gateway devices.
- * Devices used are not real. They are virtual devices and linked with Oracle Internet of Things (IoT) CS.

NO.87 Integration Insight in OIC provides a business friendly experience, allowing users to model, collect, and monitor metrics for their business Which statement is not true about Integration Insight models?

- * The activity associated with an Integration Insight model is a model instance
- * A model must have both an initial milestone and terminal milestone created in order to be activated.
- * Integration Insight models can define milestone activities in either OIC integration OIC process business processes.
- * The model identifier value must be unique and is extracted only once for a model instance and cannot be changed
- * Model indicators are limited to only one of two types: Dimensions and Measures.
- * Each model instance is a unique occurrence based on the business process that is associated with the model

Explanation

<https://docs.oracle.com/en/cloud/paas/integration-cloud/user-int-insight-oci/model-components.html#GUID-D6F>

NO.88 Which two statements are true about rules in a decision table?

- * Every rule consists of one or more input entries and a corresponding output entry.
- * A decision table can contain only one rule.
- * Rules are expressed as columns within a decision table.
- * When the input data matches the input entries of a rule, the result of the decision table contains the output entry of the rule.

NO.89 One of your downstream applications is becoming overwhelmed with too many individual synchronous invocations from your current Oracle Integration Cloud (OIC) integration. It has been recommended that you redesign the integration to take advantage of the batch processing capabilities of the application. Which is the MOST appropriate approach for implementing this OIC design best practice?

- * Create custom batch call function, register the function as a Library in your OIC environment, then use JavaScript action to invoke the application
- * Reactive the integration and use the disable tracing and message tracking option which will optimize performance for each invocation to the application
- * Use the Append option in the Write File operation of the Stage File action within a loop to create a single batch to be sent to the application
- * Throttle the individual synchronous calls by adding a Wait activity prior to each invocation to the application within the loop

NO.90 Which two statements about lookup are correct?

- * Create a lookup to map values between application.
- * Lookups are deployed as part of integration activation.
- * Changes made to lookups already used in active integrations take effect immediately.
- * You cannot clone a copy of an existing lookup.
