

2022 Valid CAS-PA Real Exam Questions, practice Certified Application Specialist [Q12-Q28]

2022 Valid CAS-PA Real Exam Questions, practice Certified Application Specialist [Q12-Q28]

2022 Valid CAS-PA Real Exam Questions, practice Certified Application Specialist Latest Success Metrics For Actual CAS-PA Exam (Updated 24 Questions)

You may face the following difficulties while writing the ServiceNow CAS-PA Certification Exam. There are numerous difficulties that the candidates may face while writing the ServiceNow CAS-PA Certification Exam. The following are the difficulties that the candidates may face while writing the ServiceNow CAS-PA Certification Exam: The ServiceNow CAS-PA Certification Exam will test the candidates' knowledge about the data collection, data visualization, and configuration of indicators. You may not have enough time to analyze all the data that is required for the exam. The CAS-PA Exam will require the candidates to spend a lot of time analyzing all the data that is required for the exam. This exam will test the candidates' knowledge. For this, the candidates will be required to spend a lot of time analyzing all the data that is required for the exam. The questions in the exam are mostly very complex and the candidates will not be able to understand all the questions in the exam. Moreover, the candidates are not aware of the syllabus, resources, and structure of the ServiceNow CAS-PA Certification Exam. The candidates may not have sufficient knowledge about the ServiceNow platform. The candidates will not be able to understand the ServiceNow CAS-PA Certification Exam. Don't worry, **CAS-PA Dumps** is here to help you.

Have a look at the info about the Passing Score, time duration, language, and passing score for the

ServiceNow CAS-PA Certification Exam

Info about the exam's structure, time duration, passing score, etc. is elaborated in the **CAS-PA Dumps**. The overview of that info is given as follows

Exam type: MCQs Languages: English Number of Questions: 60 questions Time Duration: 75 minutes The passing score: 70%

QUESTION 12

Which of the following can be used across all the visualisations in a workspace?

- * Signal
- * Dashboard Builder
- * Studio
- * User Experience filter

Create a single User Experience filter for use across all the visualisations in a workspace.

The filter you create is available in the workspace in which you created it.

For filters to work in workspaces, you must configure an event handler to apply the filters.

QUESTION 13

What role or access do users need to act on a signal to reset a baseline or dismiss a signal?

- * Responsible users without workspace access
- * Users with the admin, pa_admin, or pa_kpi_signal_admin role without being a responsible user
- * Only users with the admin role
- * Users irrespective of their level of responsibility

Users with the admin, pa_admin, or pa_kpi_signal_admin role can reset a baseline or dismiss a signal without being a responsible user.

Users with other roles must become responsible users to take such actions. These users also need a role that gives them access to a relevant workspace.

You can assign responsibility for KPI Signals for a KPI to yourself or someone else. You can also unassign responsibility.

QUESTION 14

What role is required to create personal targets and thresholds for users who can view an indicator on the Analytics Hub?

- * pa_viewer
- * pa_target_admin
- * pa_threshold_admin
- * No role

On the Analytics Hub, no roles are required to create personal targets and thresholds.

A threshold or a target can be personal or global.

A personal threshold or target is visible only to the user that created it.

A personal threshold appears as a light grey dotted line. A personal target appears as a dark line.

Personal thresholds and targets appear only on the Analytics Hub and KPI Details but not on widgets.

QUESTION 15

Which of the following data update settings for single score visualisations shows the timestamp of when the score was last updated?

- * Show score update time
- * Real time update
- * Background refresh interval (minutes)
- * Follow filters

‘Show score update time’ shows the timestamp of when the score was last updated.

‘Follow filters’ set for a workspace page. When enabled, the visualisation displays on a workspace with the filters set by the page. Toggle off to disable a visualisation from accepting any filter input.

‘Background refresh interval (minutes)’ shows how often, in minutes, the landing page refreshes the visualisation if you have navigated away from it.

‘Real time update’ updates score in real-time.

QUESTION 16

What ‘related lists’ are available on the formula indicator form? (Choose three.)

- * Targets
- * Contributing Indicators
- * Breakdowns
- * Signals

Here are the available related lists on the baseline configuration when navigating to the Formula Indicators form: Breakdowns, Contributing Indicators, Time series exclusions, Targets, Thresholds, and Diagnostic Results.

‘Signals’ is not an out-of-the-box related list on the Formula Indicators form.

Use the Contributing indicators related list to navigate to the indicators used in the formula or their indicator sources. If you include another formula indicator in the formula, both that indicator and its contributing indicators are listed.

QUESTION 17

How are responsible users reminded when a signal remains unresolved?

- * Via Virtual Agent
- * Via Connect Chat
- * By email notification
- * By text message

As a responsible user, you receive email reminders about signals that have not been resolved.

You can configure how frequently you get these reminders and the maximum number of reminders to get for a signal.

Responsible users get email notifications about the following:

- * New signals
- * Unresolved signals

* Actions to resolve signals

* ‘Anti-signals,’ which indicate that a KPI is long-term stable

Even responsible users without workspace access get these email notifications.

QUESTION 18

Which of the following can you do when you set a target for an indicator on the Analytics Hub? (Choose three.)

- * Set the improvement as a percentage.
- * Set a review date on which to consider updating the target.
- * Set the threshold as an improvement on the average score.
- * Set a start date in the future.

You can set target values for indicators. When you set a target for an indicator on the Analytics Hub, you can now do the following:

- * Set a start date in the future.
- * Set a review date on which to consider updating the target.
- * Set the target as an improvement on the average score or on the previous target. You can set the improvement as a percentage.

You can have the targets apply only to specific breakdown elements and time series. The target starts to apply at a selected date and continues to apply until you set the next target. However, you can set a review date on which to reconsider the target.

QUESTION 19

Which of the following are true statements about configuring pie, donut, and single score visualisations in workspaces?

- * Data labels are shown as only percentages, as values, or as both.
- * Legend percentages are shown along with values.
- * The metric label name is displayed near the metric value.
- * Set gradient, texture, or no colour options for data display.

A pie visualisation shows how individual pieces of data relate to the whole using a circle to represent the whole.

A Donut visualization shows how individual pieces of data relate to the whole using a donut shape to represent the whole.

Single score visualisations display a single, key business value or current aggregate indicator score. You can set a score to update in real-time.

The following enhancements are made to pie, donut, and single score visualisations in the Quebec release:

- * The metric label name is displayed near the metric value.
- * Legend percentages are shown along with values.
- * Data labels are shown as only percentages, as values, or as both.

Gradient, texture, or no colour are not valid colour options for data display.

You can set ‘default’, ‘colour palette’ and ‘fixed element colour’ for pie and donut visualisations, and ‘default’ and ‘single colour’ for single score visualisations.

QUESTION 20

Which of the following items can you view without the pa_viewer role if the indicator and breakdown ACLs are respected? (Choose two.)

- * Diagnostic Results
- * KPI Details
- * Analytics Hub
- * Widget Statistics

You can rely less on roles and more on access control lists (ACLs) to secure Performance Analytics.

On new instances, you no longer need the pa_viewer role to view the following items. Instead, indicator and breakdown ACLs are respected:

- * Analytics Hub
- * Text Analytics widgets
- * KPI Details
- * Breakdowns on workbench widgets

Performance Analytics widgets: In general, Performance Analytics widgets follow indicator and breakdown ACLs.

Targets and Thresholds: On the Analytics Hub, no roles are required to create personal targets and thresholds.

QUESTION 21

What is an easy way for a responsible user to get real-time updates on the signals for a particular KPI?

- * Monitoring the signal score on a dashboard
- * Receive email notifications
- * Schedule a report for the signal data
- * Manually check the KPI doe signals

As a responsible user, you can receive email notifications about new or unresolved signals, anti-signals, or any actions taken on signals.

You can configure how frequently you get these reminders and the maximum number of reminders to get for a signal.

You no longer have to open KPI Signals and manually check each KPI for signals.

Scheduling a report for the signal data does not provide real-time updates.

Manually check the KPI for signals and monitoring the signal score on a dashboard requires the user to constantly check for the updates without a pause, which is not easy.

What are the prerequisites to take the ServiceNow CAS-PA Certification Exam?

Evidently, the candidate needs to have basic knowledge about the ServiceNow platform. The candidate must have knowledge about the data collection, data visualization, and configuration of indicators. The views and good knowledge of the technical aspects of the ServiceNow platform of the candidates on the ServiceNow platform should be good.
