NEW QUESTION 57

A global financial institution is implementing data masking technology to protect personal data used for testing purposes in

non-production environments. Which of the following is the GREATEST challenge in this situation?

* Access to personal data is not strictly controlled in development and testing environments.
* Complex relationships within and across systems must be retained for testing.
* Personal data across the various interconnected systems cannot be easily identified.
* Data masking tools are complex and difficult to implement.

NEW QUESTION 58

Which of the following is the BEST indication of an effective records management program for personal data?

* Archived data is used for future analytics.
* The legal department has approved the retention policy.
* All sensitive data has been tagged.
* A retention schedule is in place.

NEW QUESTION 59

During which of the following system lifecycle stages is it BEST to conduct a privacy impact assessment (PIA) on a system that holds personal data?

* Functional testing
* Development
* Production
* User acceptance testing (UAT)

NEW QUESTION 60

Which of the following is a PRIMARY objective of performing a privacy impact assessment (PIA) prior to onboarding a new Software as a Service (SaaS) provider for a customer relationship management (CRM) system?

* To identify controls to mitigate data privacy risks
* To classify personal data according to the data classification scheme
* To assess the risk associated with personal data usage
* To determine the service provider’s ability to maintain data protection controls

NEW QUESTION 61

Which of the following is the BEST approach to minimize privacy risk when collecting personal data?

* Use a third party to collect, store, and process the data.
* Collect data through a secure organizational web server.
* Collect only the data necessary to meet objectives.
* Aggregate the data immediately upon collection.

NEW QUESTION 62

Which of the following should be done FIRST to address privacy risk when migrating customer relationship management (CRM) data to a new system?

* Develop a data migration plan.
* Conduct a legitimate interest analysis (LIA).
* Perform a privacy impact assessment (PIA).
* Obtain consent from data subjects.

NEW QUESTION 63

Which of the following is the MOST important consideration to ensure privacy when using big data analytics?

* Maintenance of archived data
* Disclosure of how the data is analyzed
* Transparency about the data being collected
* Continuity with business requirements

NEW QUESTION 64

What type of personal information can be collected by a mobile application without consent?

* Full name
* Geolocation
* Phone number
* Accelerometer data

NEW QUESTION 65

Of the following, who should be PRIMARILY accountable for creating an organization’s privacy management strategy?

* Chief data officer (CDO)
* Privacy steering committee
* Information security steering committee
* Chief privacy officer (CPO)

Some organizations, typically those that manage large amounts of personal information related to employees, customers, or constituents, will employ a chief privacy officer (CPO). Some organizations have a CPO because applicable regulations such as the Gramm-Leach-Bliley Act (GLBA) require it. Other regulations such as the Health Information Portability and Accountability Act (HIPAA), the Fair Credit Reporting Act (FCRA), and the GLBA place a slate of responsibilities upon an organization that compels them to hire an executive responsible for overseeing compliance.

NEW QUESTION 66

Which of the following is MOST important when designing application programming interfaces (APIs) that enable mobile device applications to access personal data?

* The user’s ability to select, filter, and transform data before it is shared
* Umbrella consent for multiple applications by the same developer
* User consent to share personal data
* Unlimited retention of personal data by third parties

NEW QUESTION 67

An organization’s data destruction guidelines should require hard drives containing personal data to go through which of the following processes prior to being crushed?
