Free C\_MDG\_1909 Exam Questions C\_MDG\_1909 Actual Free Exam Questions

**NO.34** Which threshold definitions for fuzzy matching and matching using Business Address Service (BAS)-Adapter are possible?

There are 3 correct answers to this question.

- \* Match groups that have matches above an upper threshold are sent to a change request automatically.
- \* Records within open match groups are processed separately as single records.
- \* Match groups that have matches below an upper threshold are open and approved or rejected manually.
- \* Records within open match groups are rejected automatically.
- \* Match groups that have matches above an upper threshold are approved automatically.

**NO.35** How do you ensure an attribute is mandatory when an entity is governed? Note: There are 2 correct answers to this question.

- \* Implement a custom validation (for example via ABAP or BRFplus) on the corresponding field.
- \* Adjust the change request customizing for the corresponding field to mandatory.

- \* Adjust the data model by selecting the Required check box for the corresponding field.
- \* Create a new business activity and select the field as mandatory.

**NO.36** Which of the following steps need to be performed to set up a parallel change request type for material? Note:

There are 2 correct answers to this question.

- \* Create a new change request type and enable the request as parallel with business activity to process material.
- \* Create a new change request type and enable the request as a single object with business activity to create material.
- \* Assign the scope on entity level per entity type with business activity to create material.
- \* Assign the scope on entity level per entity type with business activity to process material.

**NO.37** In which SAP Master Data Governance customizing activity can you define the SLAs (days and hours by priority)?

Please choose the correct answer

- \* Define Priorities for Change Request
- \* Define Change Request Actions
- \* Configure Properties of Change Request Step
- \* Create Change Request Type

**NO.38** Which of the following is reference data or customizing data for SAP Master Data Governance? There are 3 correct answers to this question.

- \* Plants
- \* Purchasing Organizations
- \* Sales Orders
- \* Cost Center Postings
- \* Country Code

**NO.39** You want to configure the Filter and Remove (FAR) process step in SAP Master Data Governance consolidation and mass processing. Immediately before/after which other process steps should it be configured? Note: There are 3 correct answers to this question.

- \* Before the standardization step
- \* After the best record calculation step
- \* After the data load step
- \* After the matching step
- \* After the validation step

**NO.40** You create and replicate a (time-dependent) cost center in editionA (validity 01.01.2020 -31.12.9999). Next, you change and replicate the cost center responsible person in edition B (validity 01.01.2021 &#8211; 31.12.9999).

What happens in the target system cost center master data table (CSKS)? Choose the correct answer.

- \* A second data set is created (from 01.01.2021) and the first data set is NOT updated.
- \* The first data set is restricted in its validity (until 31.12.2020) and the second data set is created (from 01.01.2021).
- \* The first data set is marked for deletion and a second data set is created (from 01.01.2021).
- \* The first data set is updated with the data of the second data set.

**NO.41** What are the advantages of having SAP Master Data Governance deployed as a hub system? Note: There are 2 correct answers to this question.

- \* Increased flexibility for master data lifecycle management

- \* No latency for data replication and no cross-system monitoring
- \* No system integration required
- \* Higher flexibility with mapping

**NO.42** You want to deploy the SAP Master Data Governance for Material domain in the same ERP system without the need to distribute the governed data. Which of the following activities would you perform? Note: There are

2 correct answers to this question.

- \* Configure ALE and replication model for material.
- \* Setup rule based workflow.
- \* Synchronize ERP reference data.
- \* Reuse ERP customizing data.

**NO.43** What is the purpose of the Define Governance Scope customizing in SAP Master Data Governance (MDG)?

Please choose the correct answer.

- \* Define which fields should be governed in which change request step of your process
- \* Define which fields are required to be maintained in the governance processes
- \* Define which processes for your SAP MDG applications should be executed
- \* Define which fields are governed in the data model for your SAP MDG application

**NO.44** You want to reduce the impact on system performance after a mass data load by avoiding the non-intentional replication of large amounts of data. Which replication modes are applicable? Note: There are 2 correct answers to this question.

- \* SOA-based replication
- \* Filters and change pointers
- \* Limit changes using time interval
- \* DRFLOG transaction

**NO.45** You want to derive fields like transportation zone and country based on the business partner group. What options are available to achieve this? Note: There are 2 correct answers to this question.

- \* Use the access class to derive the fields based on the Business Partner Group field in the user interface when the change request is submitted.
- \* Use a custom feeder class to derive the fields based on Business Partner group field in the user interface.
- \* Use the CROSS\_ENTITY\_BADI to derive the fields based on the Business Partner Group field in the user interface.
- \* Use Business Rule Framework Plus (BRFplus) to derive the fields using a decision table based on the Business Partner Group field in the user interface.

**NO.46** What is the difference between loose and strict interlocking for hierarchies? There are 2 correct answers to this question.

- \* Loose inter locking locks only the next parent element in the hierarchy in the same change request.
- \* Strict inter locking locks only the element assigned to the hierarchy in the same change request.
- \* Loose inter locking locks only the next child element in the same change request.
- \* Strict inter locking locks the whole hierarchy in the same change request.

**NO.47** You upload a file with new or changed master data. What are the implications regarding the change request?

There are 2 correct answers to this question.

- \* A change request can be created at the end of the upload
- \* Multiple change request will be created depending on configuration and file size
- \* A change request must be created pr or to the start of the upload
- \* Objects already in a change request will be updated to the same

**NO.48** Your SAP Master Data Governance (MDG) project requires additional domains provided by the SAP solution extensions by Utopia . Which implications does this have?

There are 3 correct answers to this question.

- \* The solution extension is directly delivered as integral part of SAP ECC or SAP S/4HANA.
- \* The solution extension customizing is separated from SAP MDG standard customizing.
- \* The software license for the solution extension can be purchased directly from SAP.
- \* In case of software-related issues, customers can directly open message in SAP OSS system.
- \* Software fixes are made available on the SAP support portal and can directly be installed via notes and related correct ons.

**NO.49** You want to improve the quality of business partner data in SAP Master Data Governance central governance using SAP and non-SAP external solutions. Which data quality improvement check can you implement?

Choose the correct answer.

- \* Configure the value added tax (VAT) check using the Service Mapping Tool (SMT).
- \* Implement address validation checks using the Enrichment Framework.
- \* Implement a credit-worthiness check using the Dun & Bradstreet interface and the Data Import Framework.
- \* Configure duplicate checks using customer vendor integration(CVI) and SAP microservices.

**NO.50** Define Steps for your rule-based workflow change request type. 5. Use the copy function to implement these steps equal to the steps for the source process MAT01?

- \* In the IMG choose Process Modeling Workflow Rule-Based Workflow Define Change Request Steps for Rule-Based Workflow.
- \* Enter the data, as shown in you see in the figure.
- \* In the IMG choose Process Modeling Workflow Define Change Request Actions. See first part of the next figure.
- \* In the activity enter the data from the table in the step. See the second part of the next figure.

**NO.51** How is the material in SAP Master Data Governance (MDG) for material activated in a typical MDG setup to the underlying client of the same system?

Please choose the correct answer.

- \* Automatically due to the flex mode via replication using IDocs or Web services
- \* Automatically due to the reuse mode via replication using IDocs or Web services
- \* Automatically due to the flex mode via the pre-delivered standard handler class
- \* Automatically due to the reuse mode via the pre-delivered standard handler class

**NO.52** What are the includes in FPM adaptable OVP configuration?

- \* A reference to the adaptation schema to be used
- \* In the IMG choose Process Modeling Workflow Define Change Request Actions.

See first part of the next figure.

- \* In the activity enter the data from the table in the step. See the second part of the next figure.
- \* The schema, as defined in view cluster FPM\_VC\_ADAPT\_SCHEMA

**NO.53** Which actions are necessary to successfully import a file with changes in mass processing? Note: There are 2 correct answers to this question.

- \* Find duplicates based on business rules.
- \* Ensure there is one worksheet for each table to be updated.
- \* Upload a workbook to update tables and fields.
- \* Monitor the process for each worksheet and the volume of data.

**NO.54** What are the hints about defining governance scope?

- \* Governance scope determines the fields from the data model that can be edited by the MDG application.
- \* By deactivating or reactivating an entity, relationship, or attribute, you do not change any dictionary or database object; you change only the ability of MDG to edit the chosen object.
- \* When you take a field out of governance scope, it becomes read-only on the MDG UI and you may wish to remove it.
- \* You can use the customizing activity Import BC Set to Reset Governance Scope to set the governance scope to the EPH6 model which contains only identifying and descriptive data.
- \* None of the above.

**NO.55** In which process steps can you integrate Business Rule Framework plus checks and Business Rule Framework plus enhancements?

There are 3 correct answers to this question.

- \* Filter and Remove
- \* Standardization
- \* Best Record Calculation
- \* Validation
- \* Matching

**NO.56** What are the includes in FPM application configuration?

- \* Configuration ID of FPM Adaptable OVP
- \* Configuration ID of FPM OVP Floorplan
- \* Object type code (USMD\_OTC), which provides the MDG data model and

the root entity type

- \* None of the above

**NO.57** You set FPM expert and admin mode as shown in the figure, Setting FPM

Expert and Admin Mode. Specify your user with the parameter for

FPM\_CONFIG\_EXPERT as follows:

- \* A ; Admin Mode (= Customizing)
- \* X ; Expert Mode (= Configuration)
- \* M- Import Mode (= Configuration)
- \* All of the above
