You need to know the basics of SAP S/4HANA Sourcing and Procurement

In this guide series, we'll explain the key innovations in SAP S/4HANA Sourcing and Procurement.

You need to know the basics of SAP S/4HANA Sourcing and Procurement.

SAP S/4HANA Sourcing and Procurement is a comprehensive suite of solutions that support the procurement process from planning through execution. It is an integral part of SAP S/4HANA and offers a wide range of innovations based on the latest technologies (such as machine learning and big data) as well as new UI5-based applications for a simplified user experience. SAP HANA Cloud Platform is used for integration with other solutions, such as Ariba, Concur, Fieldglass, Hybris solutions, and SuccessFactors solutions. **SAP C_TS450_2020 exam dumps** are the key of success.

The suite includes solutions that were formerly called 'on-premise' (such as self-service procurement, contract management, supplier relationship management [SRM], and advanced planning), as well as solutions that were formerly called 'cloud' (such as Ariba solutions).
