[Jul-2023] PSE-Strata Certification with Actual Questions from DumpsMaterials
Updated PSE-Strata Dumps PDF - PSE-Strata Real Valid Brain Dumps With 140 Questions!

Earning the Palo Alto Networks PSE-Strata certification demonstrates that an individual has the knowledge and skills required to design, deploy, configure, and manage Palo Alto Networks Next-Generation Firewalls. Palo Alto Networks System Engineer Professional - Strata Exam certification is highly valued in the network security industry and can lead to better job opportunities and higher salaries. Additionally, the certification provides a foundation for further advancement within the Palo Alto Networks certification program, including the Palo Alto Networks Certified Network Security Engineer (PCNSE) certification.

QUESTION 43

What can be applied to prevent users from unknowingly downloading malicious file types from the internet?

- * A vulnerability profile to security policy rules that deny general web access
- * An antivirus profile to security policy rules that deny general web access
- * A zone protection profile to the untrust zone

* A file blocking profile to security policy rules that allow general web access

Explanation

QUESTION 44

WildFire can discover zero-day malware in which three types of traffic? (Choose three)

- * SMTP
- * HTTPS
- * FTP
- * DNS
- * TFTP

QUESTION 45

Which three categories are identified as best practices in the Best Practice Assessment tool? (Choose three.)

- * use of decryption policies
- * measure the adoption of URL filters. App-ID. User-ID
- * use of device management access and settings
- * expose the visibility and presence of command-and-control sessions
- * identify sanctioned and unsanctioned SaaS applications

QUESTION 46

Which two components must be configured within User-ID on a new firewall that has been implemented? (Choose two.)

- * User Mapping
- * Proxy Authentication
- * Group Mapping
- * 802.1X Authentication

QUESTION 47

Which option is required to Activate/Retrieve a Device Management License on the M-100 Appliance after the Auth Codes have been activated on the Palo Alto Networks Support Site?

- * Generate a Stats Dump File and upload it to the Palo Alto Networks support portal
- * Select Panorama > Licenses and click Activate feature using authorization code
- * Generate a Tech Support File and call PANTAC
- * Select Device > Licenses and click Activate feature using authorization code

QUESTION 48

A customer is looking for an analytics tool that uses the logs on the firewall to detect actionable events on the network. They require something to automatically process a series of related threat events that, when combined, indicate a likely compromised host on their network or some other higher level conclusion. They need to pinpoint the area of risk, such as compromised hosts on the network, allows you to assess the risk and take action to prevent exploitation of network resources.

Which feature of PAN-OS can you talk about to address their requirement to optimize their business outcomes?

- * The Automated Correlation Engine

- * Cortex XDR and Cortex Data Lake
- * WildFire with API calls for automation
- * 3rd Party SIEM which can ingest NGFW logs and perform event correlation

QUESTION 49

Which four actions can be configured in an Anti-Spyware profile to address command-and-control traffic from compromised hosts?

(Choose four.)

- * Quarantine
- * Allow
- * Reset
- * Redirect
- * Drop
- * Alert

<https://www.paloaltonetworks.com/documentation/71/pan-os/pan-os/policy/anti-spyware-profiles.html>

QUESTION 50

Which statement best describes the business value of Palo Alto Networks Zero Touch Provisioning (ZTP)?

- * It is designed to simplify and automate the onboarding of new firewalls to the Panorama management server.
- * When it is in place, it removes the need for an onsite firewall
- * When the service is purchased, Palo Alto Networks sends an engineer to physically deploy the firewall to the customer environment
- * It allows a firewall to be automatically connected to the local network wirelessly

QUESTION 51

When log sizing is factored for the Cortex Data Lake on the NGFW, what is the average log size used in calculation?

- * 8MB
- * depends on the Cortex Data Lake tier purchased
- * 18 bytes
- * 1500 bytes

QUESTION 52

What are three considerations when deploying User-ID? (Choose three.)

- * Specify included and excluded networks when configuring User-ID
- * Only enable User-ID on trusted zones
- * Use a dedicated service account for User-ID services with the minimal permissions necessary
- * User-ID can support a maximum of 15 hops
- * Enable WMI probing in high security networks

QUESTION 53

When log sizing is factored for the Cortex Data Lake on the NGFW, what is the average log size used in calculation?

- * 8MB
- * depends on the Cortex Data Lake tier purchased
- * 18 bytes
- * 1500 bytes

Explanation

QUESTION 54

What are three possible verdicts that WildFire can provide for an analyzed sample? (Choose three)

- * Clean
- * Benign
- * Adware
- * Suspicious
- * Grayware
- * Malware

QUESTION 55

Which three components are specific to the Query Builder found in the Custom Report creation dialog of the firewall? (Choose three.)

- * Connector
- * Database
- * Recipient
- * Operator
- * Attribute
- * Schedule

QUESTION 56

How often are the databases for Anti-virus, Application, Threats, and WildFire subscription updated?

- * Anti-virus (weekly), Application (daily), Threats (weekly), WildFire (5 minutes)
- * Anti-virus (weekly), Application (daily), Threats (daily), WildFire (5 minutes)
- * Anti-virus (daily), Application (weekly), Threats (weekly), WildFire (5 minutes)
- * Anti-virus (daily), Application (weekly), Threats (daily), WildFire (5 minutes)

Explanation

<https://docs.paloaltonetworks.com/pan-os/9-0/pan-os-admin/software-and-content-updates/dynamic-content-upd>

QUESTION 57

In an HA pair running Active/Passive mode, over which interface do the dataplanes communicate?

- * HA3
- * HA1
- * HA2
- * HA4

QUESTION 58

Which Palo Alto Networks security component should an administrator use to and NGFW policies to remote users?

- * Prisma SaaS API
- * Threat intelligence Cloud
- * GlobalProtect

- * Cortex XDR

QUESTION 59

Where are three tuning considerations when building a security policy to protect against modern day attacks? (Choose three)

- * Create an anti-spyware profile to block all spyware
- * Create a vulnerability protection profile to block all the vulnerabilities with severity low and higher
- * Create an SSL Decryption policy to decrypt 100% of the traffic
- * Create an antivirus profile to block all content that matches and antivirus signature
- * Create a WildFire profile to schedule file uploads during low network usage windows

QUESTION 60

What filtering criteria is used to determine what users to include as members of a dynamic user group?

- * Tags
- * Login IDs
- * Security Policy Rules
- * IP Addresses

<https://docs.paloaltonetworks.com/pan-os/9-1/pan-os-new-features/user-id-features/dynamic-user-groups>

QUESTION 61

Which four steps of the cyberattack lifecycle does the Palo Alto Networks platform present?

(Choose four)

- * Breach the perimeter
- * Exfiltrate data
- * Weaponries vulnerabilities
- * Deliver the malware
- * Recon the target
- * Lateral movement

QUESTION 62

Which three platform components can identify and protect against malicious email links? (Choose three.)

- * WildFire hybrid cloud solution
- * WildFire public cloud
- * WF-500
- * M-200
- * M-600

QUESTION 63

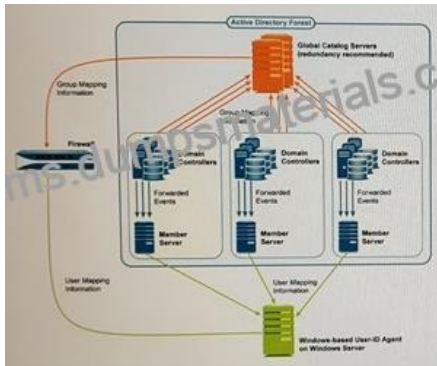

Which is the smallest Panorama solution that can be used to manage up to 2500 Palo Alto Networks Next Generation firewalls?

- * M-200
- * M-600
- * M-100
- * Panorama VM-Series

<https://knowledgebase.paloaltonetworks.com/KCSArticleDetail?id=kA10g000000boF1CAI>

QUESTION 64

Given the following network diagram, an administrator is considering the use of Windows Log Forwarding and Global Catalog servers for User-ID implementation. What are two potential bandwidth and processing bottlenecks to consider? (Choose two.)

- * Member Servers
- * Firewall
- * Domain Controllers
- * Windows Server

QUESTION 65

Which of the following statements is valid with regard to Domain Name System (DNS) sinkholing?

- * it requires the Vulnerability Protection profile to be enabled
- * DNS sinkholing signatures are packaged and delivered through Vulnerability Protection updates
- * infected hosts connecting to the Sinkhole Internet Protocol (IP) address can be identified in the traffic logs
- * It requires a Sinkhole license in order to activate

QUESTION 66

An administrator needs a PDF summary report that contains information compiled from existing reports based on data for the top 5 in each category.

How often will the Administrator receive the report?

- * Bi-weekly
- * Daily
- * Weekly
- * Monthly

QUESTION 67

A customer has business-critical applications that rely on the general web-browsing application.

Which security profile can help prevent drive-by-downloads while still allowing web-browsing traffic?

- * File Blocking Profile
- * DoS Protection Profile
- * URL Filtering Profile
- * Vulnerability Protection Profile

Palo Alto Networks PSE-Strata certification exam is an important credential for IT professionals who want to demonstrate their knowledge and expertise in network security. PSE-Strata exam covers a wide range of topics related to network security and requires a deep understanding of the subject matter. Passing the exam provides a professional certification that is recognized globally and can help IT professionals advance their careers.

Pass Your PSE-Strata Exam Easily With 100% Exam Passing Guarantee:
