# [Q70-Q90 Easily To Pass New HPE0-J68 Premium Exam Updated [Jul 14, 2023

Easily To Pass New HPE0-J68 Premium Exam Updated [Jul 14, 2023 HPE0-J68 Certification All-in-One Exam Guide Jul-2023

HP HPE0-J68 exam consists of 60 multiple-choice and scenario-based questions that need to be answered in 1 hour and 30 minutes. HPE0-J68 exam is conducted in a proctored environment, and the passing score for the exam is 70%. HPE0-J68 exam is available in English, Japanese, Simplified Chinese and Korean.

QUESTION 70

Which storage tool in the storage assessment foundry provide data protection analysis?
* Ninja protected+ (318)
* NinjaCrawler
* Ninja Thin
* Ninja Stars

QUESTION 71

Which function is built into the HPE 3par OS and enable users to move data and workloads between array without impacting applications, users, or services?
* Peer persistence

* Adaptive optimization
* Peer motion
* Remote copy

QUESTION 72

Which storage sizing tool, designed specifically for the HPE 3PAR StoreServ environment, shows the expected deduplication ratio based on actual data analysis of the customer’s current environment?
* NinjaCrawler
* StoreVista
* NinjaThin
* NinjaStars

QUESTION 73

A customer needs to add another HPE 3PAR StoreServ system and plans to use the federated storage approach.

Which advantages can the customer expect? (Choose two.)
* load balancing
* reduced power, cooling, and environmental impacts
* allows multiple management tools
* easier migration
* federated deduplication

Federated storage-Move data between storage systems in a peer-to-peer relationship simply, dynamically, and nondisruptively to improve storage utilization, balance workloads, and ease storage migration.

QUESTION 74

You have just completed a performance analysis of an HPE 3PAR StoreServ 8400 disk array with different tiers at a customer’s site. After reviewing the performance metrics, you determine that they should install a new tier of SSD drives.

Which actions should you recommend they take to fully optimize the array? (Choose two.)
* Configure Adaptive Flash Cache.
* Configure scheduled tunesys tasks.
* Rebalance all flash drives between nodes 0 and 2.
* Configure Adaptive Optimization.
* Configure dedicated drives to enable Adaptive Flash Cache.

QUESTION 75

After a performance analysis, a customer plan to reorganize his adaptive Flash cache (AFC) configuration and want to raise it from 256 to 768GB. Which action is needed to take advantage of the new AFC configuration?
* Run tunesys after raising the AFC to take advantage of the additional space
* Increase current AFC configuration to reflect the additional space
* Remove flash cache for all VVS then run create Flash cache
* Remove the old AO configuration and recreate a new one

QUESTION 76

You have proposed a Primera array to a customer for new primary storage. The customer currently has an older 3PAR array that

they will continue to use moving forward. The customer would like high availability configured.

Which RMC Peer Copy pre-requisites do you need to point out to the customer? (Choose two.)
* No license is required
* 2-port 10 Gb Ethernet Adapter (NIC) is required
* 4-port 1 Gb Ethernet Adapter (NIC) is required in each array
* RMC 6.2 is required
* Target drive type must match source drive type

QUESTION 77

Which 3PAR storeServ feature allow to host to continue I/O uninterrupted during a firmware update?
* Persistent Memory
* Persistent port (96)
* Peer persistence
D Persistent Cache

QUESTION 78

You are installing an HPE 3PAR StoreServ solution and need to integrate the array with the 3rd party monitoring application customer is using.

Which technology can be configured at 3PAR to support forwarding events from the array to the customer’s monitoring application?
* IPMI
* NTP
* SNMPv3
* DMI

QUESTION 79

In an ISCSI based storage system Proof-Of-Concept project ,the customer is not satisfied with the performance of their video streaming application .What would you recommended to the customer to optimize the excisting environment?
* Enable hardware ISCSI initiator
* Increase the switch buffer to buffer credits
* Enable jumbo frames on required components
* Consolidate the heterogeneous switches in the network

QUESTION 80

A customer need a backup solution to their virtualized environment .The backup solution must be agentless ,hypervise independent and integrated with HPE storage solutions. The solution must support Nimble snapshot and replication management. What products meets the customer requirement?
* HPE storeOnce Recovery manager central
* Commvault Simpana Intellisnap
* Micro Focus Data Protector
* Veem Backup and Replication

QUESTION 81

Which value does a Nimble solution provide in addition to other HPE storage solutions?

* Flat support pricing for all hardware components
* Future-proofed for newer technologies
* All-inclusive software licensing over 5 years and additional capacity upgrades
* Upfront option for free controller upgrade after 3 years

QUESTION 82

You are designing a new enterprise array solution. The customer is interested in a caching tier that provides extremely low-latency and persistent storage at the same time. They also need to support more than 500GB.

Which technology should you recommend?

* DRAM
* SRAM
* NVMe SCM
* NAND SSD

QUESTION 83

When using a HPE 3 PAR Storeserv array to enable a user to apply array-based data services to specific application and VM’s. What is the benefit of implementing VM-level gradually of Volts?

* Data sprawls eliminated by performing the migration functions at the array level using 3PAR HPE Dynamic Optimization
* Efficiency is maintained by reclaiming space from deleted or migrated VMs using capabilities built into the storage ASIC
* Performing is accelerated by detecting and moving the most frequently -accessed VMs into the fast class tier
* Performance is accelerated by leveraging the deduplication capabilities built into the storage ASIC

QUESTION 84

Refer to the exhibit.

You are configuring a new HPE array and verifying properties of a set of volumes.

Which RAID level is used on the VMwareDatastores-GF volume?
* RAID 0
* RAID 6
* Triple Parity+
* RAID 5

QUESTION 85

A customer with restricted budget has an existing HPE 3PAR storeserver 8200 using 10kfast class and near line drives because of the implementation of new application .the workload has shifted to be read intensive therefore ,they want to increase the read I/O performance What should they add to their environment ?
* A tier with 15k fast class 600 GB drive for new CPG, configure AO policy to advantage of new resources
* Two 400 GB SSD drives and enable adaptive flash cache (page 173) eed to check
* A tier with 15k fast class drive and implement thin provisioned deduplicated virtual volumes
* A tier of SSD and implement thin provisioned virtual volume

QUESTION 86

A customer successfully implemented an HPE Primera solution.

Which tool can be used to verify achieved savings from deduplication and compression in the customer solution?
* NinjaSTARS
* 3PAR Service Processor
* NinjaCrawler
* StoreServ System Management Console

QUESTION 87

Which SAN topology offers the highest centralized data access performance?
* Meshed
* Cascaded
* Core-Edge
* Ring

QUESTION 88

A customer is interested in integrating their HPE 3PAR StoreServ arrays into their OneView environment to support automated volume provisioning.

What must you install to enable the integration?
* HPE SAN Network Advisor Enterprise
* HPE SAN Network Advisor Professional
* 3PAR Host Explorer
* OneView Global Dashboard

QUESTION 89

Refer to the exhibit:

	Port ID	Label	System	Port Type	Port State
■	0:1:1	-	3PAR	Host	Ready
■	0:1:2	-	3PAR	Free	Loss Sync
■	0:2:1	-	3PAR	Host	Ready
■	0:2:2	-	3PAR	Host	Offline
■	0:0:1	DP-1	3PAR	Disk	Ready
■	0:0:2	DP-2	3PAR	Disk	Ready
■	0:3:1	RCIP0	3PAR	RC	Offline

0:1:1 | Overview

General

Port ID	0:1:1
System	3PAR
Label	-
Protocol	FC
Rate	8 Gbps
Adapter type	EMULEX LPe12002
CNA port	No
WWN	
Port type	Host
Mode	Target
Mode change	Allowed
Connected devices	3 hosts

Which type of data format do you expect in the red rectangle?
* 172.16.31.11/24
* 94:b4:0f:cd:34:8a
* iqn.2015-02.com.hpe:oneview-vcgeDav000
* 20110002AC00736E235.524

QUESTION 90

An HPE 3PAR StoreServ 9000 All-Flash Array customer plans to deploy a secondary array 20 km away from their primary array to enable storage replication over a dark fibre. Their existing environment consists of one HPE Synergy Frame 12000, HPE SN6000B Fibre Channel Switches, HPE FlexFabric 5700 Switch Series, and HPE StoreOnce Systems.

Which HPE license is required to meet the customer’s technical requirements?
* Intelligent Resilient Framework licenses
* HPE StoreOnce Replication
* Extended Fabric
* HPE 3PAR Remote Copy

HPE0-J68 exam consists of 60 multiple-choice questions, and the candidates are given 105 minutes to complete the exam. HPE0-J68 exam is available in English, Japanese, and Simplified Chinese languages. HPE0-J68 exam fee is $150, and the candidates can

register for the exam through the Pearson VUE website. The passing score for the exam is 65%, and the candidates who pass the exam receive the HPE Storage Solutions certification.
