The Certified Development Associate - SAP Customer Data Cloud certification exam consists of 80 multiple-choice questions that must be completed within 180 minutes. C-C4H620-24 exam covers a range of topics, including SAP Customer Data Cloud architecture, implementation and configuration, and integration with other SAP products.

Q47. You are implementing a Web site that will allow users to log in using their company credentials by initiating an OIDC flow. How would you configure your Web site and SAP Customer Data Cloud?

- * SAP Customer Data Cloud as the RP, and the Web site as the IdP
- * SAP Customer Data Cloud as the OP, and the Web site as the RP
- * SAP Customer Data Cloud as the IdP, and the Web site as the SP
- * SAP Customer Data Cloud as the SP, and the Web site as the OP

Q48. What are the building blocks of a policy? Note: There are 3 correct answer to this question

- * Assets
- * Roles
- * Users
- * Organizations
- * Conditions

Q49. What is the recommended approach to make a native API call, such as `getAccountInfo`, from an Android client?

- * Use internal SOK method `GSRequest` or `GSAPI` to call the API method with an application key and secret
- * Use internal SOK method `GSRequest` or `GSAPI` to call the API method.
- * Use an application key and secret and make an HTTP POST call to the API endpoint.
- * Use an application key and secret and make an HTTP GET call to the API endpoint.

Q50. Which of the following scenarios would trigger a registration completion screen in a registration flow? Note: There are 2 correct answer to this question

- * A user is registering via a social network that does NOT provide a value for a mandatory field.
- * A user is logging in via a social network with an e-mail that is already associated with an existing site account.
- * A user is missing a valid consent to a required consent statement.
- * E-mail verification is enabled in the RaaS policies and automatic login is disabled.

Q51. A customer has three Web sites. The customer wants a unified user database across their Web sites. For security reasons, they do NOT want seamless login when users move between any of the sites. How would this be configured in the Console?

- * One site group with SSO disabled and one segment
- * One site group with SSO enabled and two segments
- * One site group with SSO enabled and one segment
- * Two site groups with SSO disabled and one segment

Q52. Where in the schema do social networks store data about a newly registered user?

- * In the profile schema
- * In the data schema
- * In the profile and data schema
- * In the subscription schema

Q53. Which fields can be found inside a subscription schema? Note: There are 2 correct answer to this question

- * `isSubscribed`
- * `acceptanceDate`
- * `doubleOptin`
- * `isEnabled`

Q54. What is the goal of permission groups?

- * Define the privileges of Console users and applications.
- * Define the data returned by social networks.
- * Define which access the delegated admin can assign in CIAM for B2B.
- * Define the privileges of the mobile SOK.

Q55. The customer's legal team want to release a major update to terms of service. How do you ensure that existing users re-consent on their next login?

- * Update only Effective as of.
- * Update tags in Screen-Sets.
- * Update both Effective as of and Re-consent cut-off.
- * Update only Re-consent cut-off.

Q56. You've defined a new user welcome e-mail template but users are NOT receiving e-mails. How can you ensure new users will receive an automatic e-mail after the account becomes fully registered?

- * Enable New User Welcome in your schema setting.
- * Set up an SMTP server.
- * Enable New User Welcome in your RaaS policies.
- * Enable New User Welcome in your site settings.

Q57. How can you get the public certificate that is required to validate a JSON Web Token (JWT)?

- * By calling endpoint `accounts.getJWTPublicCertificate`
- * By installing the certificate file on the server and retrieving it locally
- * By calling endpoint `accounts.getJWTPublicKey`
- * By requesting the certificate from the provider by e-mail

Q58. What does progressive profiling enable you to do?

- * Automatically sign in across digital properties.
- * Add fields to the profile schema.
- * Incrementally collect profile data over time.
- * Convert a lite registration to a full account.

Q59. You have uploaded CSV translation files through the Localization menu in Screen-Sets. How do you ensure that both Screen-Set content and error messages are translated into the correct language?

- * Include the `Lang` parameter in the `WebSDK Configuration`.
- * Create an e-mail template with the correct language.
- * Include the `customLang` parameter in the `accounts.showScreenSet` call.
- * Set the `profile.locale` value in the Screen-Set.

Q60. You are using Screen-Sets on your Web site and you want to identify when a user authenticates to your site. Which event do you use to handle this?

- * `onBeforeSubmit` Screen-Sets event
- * `onConnectionAdded` global event
- * `onLogin` global event
- * `onSubmit` Screen-Sets event

Q61. What attribute in a JSON Web Token (JWT) represents the UID of the user?

- * `iss`
- * `sub`
- * `exp`
- * `id`

Q62. What must you do in the SAP Customer Data Cloud Console in order to use an API key with a mobile application?

- * Enable mobile SSO for the API key.
- * Grant mobile access to the permission group of your application key.
- * Add the mobile application bundle and package name to the list of trusted sites.
- * Enable mobile application API access permission.
