**QUESTION 94**

A Digital Developer is implementing an Open Commerce API call to add products to a basket. Given the following resource configuration:

```
{
    "resource_id":"/baskets/**",
    "methods":["get"],
    "read_attributes":"(**)",
    "write_attributes":"(**)"
}
```

Which modification allows the requests to successfully execute?

* Change the &#8220;resource_id&#8221; value to: &#8220;/baskets/*/items&#8221;.
* Change the &#8220;write_attributes&#8221; value to: &#8220;(+items)&#8221;.
* Change the &#8220;read_attributes&#8221; value to: &#8220;(items)&#8221;.
* Change the &#8220;methods&#8221; value to: [&#8220;get&#8221;, &#8220;post&#8221;].

## QUESTION 95

A Digital Developer needs to add logging to the following code:

```
var Logger = require('dw/system/Logger');

var urlEmail = 'https://api.weibo.com/2/account/profile/email.json' + accessTokenSuffix;

http.open('GET', urlEmail);
http.send();

var resultEmail = http.getText();

if (200 !== http.statusCode) {
 // Log Invalid Status Code
}
```

Which statement logs the HTTP status code to a debug-level custom log file?
* logger.getLogger(&#8216;profile&#8217;).debug(&#8220;Error retrieving profile email, Status Code: &#8220;, http.statusCode);
* logger.debug(&#8220;Error retrieving profile email, Status Code: {0} was returned.&#8221;, http.statusCode);
* Logger.getLogger().debug(&#8220;Error retrieving profile email, Status Code: {0} was returned.&#8221;,

http.statusCode);
* Logger.getLogger(&#8216;profile&#8217;).debug(&#8220;Error retrieving profile email, Status Code: {0} was
returned.&#8221;,

http.statusCode);

## QUESTION 96

Given the requirements:

* To show the washing instructions for a clothing product on a dedicated section the detail page

* Washing instructions come from the product information manager(PIM)

* To have this attribute available to localize in the Storefront.

Which action meets these requirements?
* Set the product system object type as localizable
* Add a resource file for every locale for which the attribute needs to be translated.
* Set the custom attribute as localizable
* Add a custom attribute for each locale

## QUESTION 97

A Digital Developer is implementing an Open Commerce API call to add products to a basket. Given the following resource configuration:

```
{
    "resource_id":"/baskets/**",
    "methods":["get"],
    "read_attributes":"(**)",
    "write_attributes":"(**)"
}
```

Which modification allows the requests to successfully execute?
* Change the "resource_id" value to: "/baskets/*/items".
* Change the "write_attributes" value to: "(+items)".
* Change the "read_attributes" value to: "(items)".
* Change the "methods" value to: ["get", "post"].

**QUESTION 98**

A client that sells to multiple countries in Europe needs to disable Apple Pay for Denmark.

Which Business Manager module is used to achieve this requirement?
* Locale Payments
* Payment Methods
* Payment Processors
* Apple Pay

**QUESTION 99**

Universal Containers recently completed updates to their storefront shopping cart page. A problem has been discovered since the update. Users are no longer able to submit coupon codes on this page. Additionally, authenticated users who try to add a coupon are logged out.

The following processing code is found in the Cart.js controller file:

```
function (formgroup) {
    var CSRFProtection = require('dw/web/CSRFProtection');

    if (!CSRFProtection.validateRequest()) {
        app.getModel('Customer').logout();
        app.getView().render('csrf/csrffailed');
        return null;
    }

    var result = {Cart: cart, EnableCheckout: true, dontRedirect: true};

    if (formgroup.couponCode.htmlValue) {
        var status = cart.addCoupon(formgroup.couponCode.htmlValue);
        // Update result with status of coupon
    } else {
        result.CouponError = 'COUPON_CODE_MISSING';
    }
    return result;
}
```

What should the Developer verify to identify the issue?

* The CSRF cartridge is included in the site&#8217;s cartridge path.
* The form group has the secure attribute set to true.
* The CSRF token is present in the form and is being submitted in the request.
* The CSRF settings in Business Manager are properly configured.

## QUESTION 100

A Digital Developer selects &#8220;Show Orderable Products Only&#8221; in the Search > Search Preferences Business Manager module.

Which business goal does this accomplish?

* Exclude pre-order products from search results.
* Exclude products from search results if Available to Sell (ATS) = 0.
* Exclude back-ordered products from showing on the website.
* Block displaying the product detail page if Available to Sell (ATS) = 0.

## QUESTION 101

Consider the following information:

* A merchant has this three-tier category structure setup in the Storefront catalog:

New Arrivals > Women > Clothing

* The category named Clothing has all the clothing items for Women and is merchandised.

* A Search Refinement named Newness is correctly configured for the Clothing category.

When a merchandiser views the Clothing category, the Search Refinement appears and Works as expected. However, the merchandiser does not see the Search Refinement when searching for Clothing via the Storefront search.

What is the Reason?

* There are conflicting Search Refinement definitions for Clothing and one of its parent categories
* The Search Refinement definition is not set up for the Women category
* The Search Refinement definition is not set up for the New Arrivals Category.
* The Search Refinement definitions is not set up for the Root Category

## QUESTION 102

A new product has been added to the Storefront catalog that 15 assigned to a site Which configuration does a developer need to ensure to have a new product visible in the Storefror

* The search index is built AND the product is online and searchable.
* The product has a master product AND the search index is built.
* The product has a price AND the product rs online and searchable.

## QUESTION 103

Which technical reports datapoint measures the performance of a controller&#8217;s script execution if network factors and Web

Adaptor processing is ignored?
*  Response time
*  Processing time
*  Call count
*  Cache hit ratio

## QUESTION 104

Which is an appropriate use of the <isif> ISML tag that follows B2C Commerce and SFRA best practices?
*  Display a section of the page to logged users only
*  Implement involved business logs through conditional statements.
*  Redirect users to the registration page if they are not logged in

## QUESTION 105

A digital instance has one site, with one master product catalog separate from the site catalog. Some, but NOT all, products in the master catalog are assigned to categories of the site catalog.

Using Business Manager, how can a Digital Developer create a catalog export file that contains only the products assigned to the site catalog?
*  Use the Catalog Export module to export the site catalog.
*  Use the Catalog Export module to export the master catalog, with a category-assignment search to export specific products.
*  Use the Site Import & Export module to export both the site catalog and the master catalog in a single archive.
*  Use the Site Import & Export module to export the master catalog, filtered by site catalog categories to export specific products.

## QUESTION 106

Which three techniques improve client-side performance in production while following documented best practices? (Choose three.)
*  Use one style sheet for each ISML decorator template.
*  Place CSS outside of templates.
*  Compress CSS.
*  Use inline Javascript.
*  Combine several images into a single image.

## QUESTION 107

A developer working on a multi-country site is asked to store country-specific data that drives the creation of a country selector. Examples of the data stored are:

* Pricebook to be used

* Image URL for country flag

The data used in staging also applies in production, but only for this site.

Which approach should the developer take to implement these requirements?
*  Extend the Locale System Object to contain the custom data for each country
*  Create a replicable, site-specific Custom Object with the custom data for each country
*  Create a replicable, organization scope Custom Object with the custom data for each country
*  Create site-specific content assets to store the data for each country

**QUESTION 108**

A client has a requirement to render different content on the homepage based on if the customer is logged in or guest user.

What should a developer implement to achieve this requirement?
* Write specific custom code in the Content Asset for a customer that is a registered, versus unregistered, user.
* Set the Content Slot configuration so it is based on the system customer group registered, versus unregistered.
* Set the Content Asset configuration for a customer that is a registered, versus unregistered, user.
* Add specific custom messages in Page Designer for a customer that is a registered, versus unregistered, user.
