- * Frame size
- * Weight relative to height
- * Distribution of body weight
- * The amount of subcutaneous fat

Section: Volume B

NO.87 The personal trainer's analysis of posture and body alignment should be made from which of the three different positions?

- * Anterior, posterior, superior
- * Line of gravity, laterally from both sides, posterior
- * Line of gravity, posterior, superior
- * Anterior, posterior, laterally from both sides

Section: Volume B

NO.88 As described by the American College of Sports Medicine, proper technique during the push-up test involves

- _____.
- * timing the number of push-ups performed in two minutes
 - * requiring both female and male subjects to use the toes as the pivotal point of movement
 - * allowing a slight (20°) elbow flexion at the top of the movement
 - * stopping the test when the subject strains forcibly

Section: Volume B

NO.89 What is the suggested order of an exercise session?

- * Stretch, warm-up, endurance phase, cool-down
- * Warm-up, endurance phase, cool-down, stretch
- * Stretch, endurance phase, warm-up, cool-down
- * Warm-up, endurance phase, stretch, cool-down

NO.90 Which of the following is the term used for a training regimen that begins with rapid eccentric muscle action followed by concentric action of the same muscle?

- * Proprioceptive Neuromuscular Facilitation
- * Plyometrics
- * Dynamic Activity Preparation
- * Progression

NO.91 What is a result of resistance training in adolescents?

- * It promotes muscular strength.
- * It increases muscular bulk.
- * It increases the risk of osteoporosis.
- * It causes permanent musculoskeletal damage.

Section: Volume A

NO.92 Which of the following indicates the correct order for a traditional periodization program for resistance training?

- * hypertrophy, peaking, strength/power, recovery
- * strength/power, peaking, recovery, hypertrophy
- * strength/power, hypertrophy, recovery, peaking
- * hypertrophy, strength/power, peaking, recovery

NO.93 What is a potential side effect of taking diet pills prior to an exercise session?

- * Increased fatigue
- * Increase in muscle soreness
- * No side effect on exercise and training
- * Increase in blood pressure and heart rate

NO.94 Which of the following bones facilitate movement of the chest during both inspiration and expiration?

- * clavicle
- * scapula
- * carpal
- * scalene

Section: Volume A

NO.95 What is bradycardia?

- * Heart rate less than 60 beats per minute
- * Heart rate greater than 100 beats per minute
- * Heart rate between 70 and 80 beats per minute
- * Heart rate between 90 and 100 beats per minute

NO.96 Which of the following modifiable risk factors is the most preventable cause of death in the United States today?

- * Diabetes
- * Hypertension
- * Cigarette Smoking
- * Hypercholesterolemia

Section: Volume B

NO.97 Which muscle is an antagonist of the hamstrings?

- * Gastrocnemius
- * Iliopsoas
- * Gracilis
- * Sartorius

NO.98 Which blood lipid is influenced more by physical activity than by nutrition modification?

- * LDL
- * HDL
- * VLDL
- * Total cholesterol

NO.99 What respiratory muscles can cause forceful expiration?

- * External intercostals
- * Pectoralis minor
- * Sternocleidomastoid
- * Internal intercostals

NO.100 During your initial assessment of your client, you notice her resting heart rate is 45 beats per minute, while asymptomatic and not taking any medication. Based on this information, what best describes the heart rate?

- * Regular
- * Tachycardia
- * Bradycardia
- * Normal
