[Full-Version] 2023 New Preparation Guide of SAP C_IBP_2302 Exam
C_IBP_2302 Practice Exam - 82 Unique Questions

QUESTION 41

You need to create time periods for the time profile in a planning area. What should you be aware of when running the Create Time Periods application job?

- * The assigned Planning Area must be active.
- * This application job can be run for multiple time profiles at once.
- * In the Parameter Section of the application job, choose the Time Profile ID and Planning Area.
- * A time profile has to be activated so that the application job can proceed.

QUESTION 42

You created a key figure and want to add calculations. Which of the following rules do you consider? Note: There are 2 correct answers to this question.

- * Key figures can be calculated across different planning levels.
- * The calculation chain for a key figure must always result in a calculated key figure.

- * Aggregation calculations using SUM or MAX functions must be based on a higher aggregation level.
- * All key figure calculations have calculation inputs, which can be marked as stored or calculated.

QUESTION 43

You have to be logged on to two separate SAP IBP tenants. What can help you differentiate the appearance of their user interfaces? Note: There are 2 correct answers to this question.

- * Setting a separate theme for the Home page in the Web UI.
- * Add the system name and tenant information from the About section to the Home page.
- * Defining a different default planning area via the User Preferences.
- * Having a different set of tiles in the Home group of apps.

QUESTION 44

What do you need to be aware of when using multiple pairs of key figures in one copy operator? Note: There are 2 correct answers to this question.

- * Copying multiple key figures can be processed sequentially.
- * If necessary source key figures values are disaggregated.
- * Copying multiple key figures on different planning levels is not possible.
- * If necessary target key figures values are disaggregated.

QUESTION 45

Which of the following solutions are feasible when using the time series supply optimizer? Note: There are 3 correct answers to this question.

- * Violation of minimum resource utilization
- * Not adhering to maximum transport values
- * Not respecting production capacity
- * Violation of minimum aggregated inventory values
- * Not-fully satisfied demands

QUESTION 46

You need to use your resource cost effectively with a certain minimum use, even if it means producing more than demand. Which solutions would apply to this scenario? Note: There are 2 correct answers to this question.

- * Capacity leveling will be possible for production and storage resources.
- * Balance can be achieved between excessive prebuild and minimum use by incorporating violation costs.
- * Excess stock can be generated and will need to be staged in an overflow warehouse.
- * Minimum capacity utilization will result in pull production occurring.

QUESTION 47

Which pre-processing steps can be used to cleanse historical sales data before generating a statistical forecast in SAP IBP? Note: There are 2 correct answers to this question.

- * Substitute Missing with Mean or Median in Sales History
- * Intermittency Detection and Correction in Sales History
- * Promotion Sales Lift Elimination
- * Bias Detection and Correction in Sales History

QUESTION 48

Which of the following are features of the S&OP process templates?Note: There are 2 correct answers to this question.

- * New instances of templates allow for re-use of the same processes.
- * All process templates are assigned to dashboards.
- * Each step depicted in the template can have tasks associated with it.
- * The S&OP process step can be started with an application job.

QUESTION 49

You are reviewing the master data types that are often used for supply and inventory planning

.Which master data types are compound master data types?Note: There are 2 correct answers to this question.

- * SOURCELOCATION
- * SOURCECUSTGROUP
- * SOURCECUSTOMER
- * SOURCEPRODUCTION

QUESTION 50

Which constraints are taken into account by the Time-Series-Based Supply Planning Heuristic (Infinite)?Note: There are 3 correct answers to this question.

- * Transportation lead times
- * Maximum lot size
- * Minimum lot size
- * Adjusted transport receipts
- * Aggregated constraints

QUESTION 51

Forecast Error CV is an input to which of the following?

- * Time-Series-Based Supply Planning Optimizer
- * Calculate Target Inventory Components in Inventory Planning Profile Operator
- * Forecast Error Calculation in Inventory Planning Profile Operator
- * Multistage Inventory Optimization in Inventory Planning Profile Operator

QUESTION 52

You have set up a planning area, and data is now available. You adjust the necessary time profile settings and run a consistency check.Which settings can you change and still run a successful consistency check?Note: There are 2 correct answers to this question.

- * Add a new time profile level to the time profile.
- * Change the numbering hierarchy of the period IDs in the time profile.
- * Change the description of the attributes in the time profile.
- * Change the past and future horizon of the levels in the time profile.

QUESTION 53

Which of the following are capabilities of the Manage Forecast Error Calculations – Inventory Optimization app?Note: There are 2 correct answers to this question.

- * Adjust for forecast bias in Forecast Error CV calculations
- * Propagate forecast error to upstream locations in a supply chain network

- * Adjust Safety Stock Recommendations based on forecast error CV input
- * Identify intermittent demand for Forecast Error CV calculations

QUESTION 54

Model configuration allows the attributes of a master data type to be assigned as key figures. Which features are relevant for this type of object?

- * This type of key figure is not usually stored and it cannot be set to editable.
- * This object is not exposed to the user in planning views or modeling.
- * This object contains user-defined criteria that monitor the running of business plans.
- * This object provides a single value for a unique planning combination.

QUESTION 55

What are some of the prerequisites for configuring a planning area that results in a successful consistency check? Note: There are 2 correct answers to this question.

- * Configure at least one calculated key figure for the planning area.
- * Specify a planning horizon in the planning area for each level of the assigned time profile.
- * Configure at most two input key figures on the same planning level in a key figure calculation.
- * Assign the compound master data type and its component master data types.

QUESTION 56

You are working on a mid-range plan that spans the seasonal peak and you are evaluating the need for additional crewing. Which of the following parameters can you model to plan production with extra shift(s)?

- * Capacity expansion with additional costs
- * Adjusted production interactive values
- * Incremental production values
- * Production source validity at the start of seasonal peak

QUESTION 57

Why would you set up a cascading filter in the planning view? Note: There are 2 correct answers to this question.

- * To filter attributes based on specific values
- * To filter using attributes that have a large number of values
- * To filter data in an Application Job template
- * To filter attributes based on other attribute filters

SAP C-IBP-2302 Exam covers various topics related to SAP IBP for Supply Chain, including demand management, inventory optimization, sales and operations planning, and supply planning. C_IBP_2302 exam consists of 80 multiple-choice questions that

need to be answered within 180 minutes. To pass the exam, candidates are required to achieve a minimum score of 65%. Certified Application Associate - SAP IBP for Supply Chain (2302) certification is valid for three years, after which individuals need to retake the exam to maintain their certification status. By obtaining the SAP C-IBP-2302 certification, professionals can enhance their career prospects and demonstrate their knowledge and skills to potential employers.

SAP C_IBP_2302 certification exam is a globally recognized certification that can enhance the candidate's career prospects in the field of supply chain management. Certified Application Associate - SAP IBP for Supply Chain (2302) certification demonstrates the candidate's proficiency in SAP IBP for Supply Chain and validates their skills in implementing and managing the solution.
