2023 100% Free CCD-102 Daily Practice Exam With 207 Questions [Q111-Q134

2023 100% Free CCD-102 Daily Practice Exam With 207 Questions
CCD-102 exam torrent Salesforce study guide

If you are interested in e-commerce development and the Salesforce platform, the Salesforce CCD-102: B2C Commerce Developer with SFRA exam is a must-have certification. It helps you stand out in the competitive space and enables you to create effective e-commerce solutions that drive growth and enhance customer experience. So, prepare well and take the exam today to take your career to the next level.

Earning the Salesforce CCD-102 certification demonstrates to employers and clients that the developer has the knowledge and skills required to work with B2C Commerce Cloud and SFRA. B2C Commerce Developer with SFRA certification can open up new job opportunities and increase the developer's earning potential. Additionally, certified developers have access to the Salesforce Trailblazer community, where they can network with other certified professionals and stay up-to-date with the latest developments in the field.

Q111. Given the requirements:

* To show the washing instructions for a clothing product on a dedicated section the detail page

* Washing instructions come from the product information manager(PIM)

* To have this attribute available to localize in the Storefront.

Which action meets these requirements?
* Set the product system object type as localizable
* Add a resource file for every locale for which the attribute needs to be translated.
* Set the custom attribute as localizable
* Add a custom attribute for each locale

Q112. Which code sample is required to use a custom tag provided in SiteGenesis in an ISML template?
* <isinclude url=”${URLUtils.url(“CustomTag-Start”)}>
* <isscript>

dw.util.CustomTagMgr.createCustomTag(“mytag”); <isscript>
* <isinclude template=”util/modules”>
* <isinclude template=”util/customtags”>

Q113. The Client currently manages Customers, Inventory, and Product Information with dedicated backend systems as shown In the Systems Diagram below. There is also an external Email Marketing System (EMS) in place. The EMS needs order data to email recommendations to customers using an existing email campaign. These recommendations should be to only send for products that are in stock. The EMS has no access to the backend systems so this data should come from the Salesforce B2C Commerce site.

Which relationships should be added to the Systems Diagram to complete it and fulfill the chant requirements necessary for the email campaign?
* Order, Customer, and Product data should be exported from Staging. Inventory data should be exported from Production.
* Order, Customer, and Inventory data should be exported from Production. Product data should be exported from staging.
* Order and Customer data should be exported from Production. Product and Inventory data should be exported from Staging.
* Order and Inventory should be exported from Production. Products should be exported from Staging. Customers should be exported from the external Customer Management System.

Q114. A developer working on a multi country site is asked to store country specific data that drives the creation of a country

selector. Examples of the data stored are:

* Pricebook to be used

* Image URL for country flag

The data used in staging also applies in production, but only for this site.

Which approach should the developer take to implement these requirements?
* Extend the Locale System Object to contain the custom data for each country.
* Create a replicable, site-specific Custom Object with the custom data for each country.
* Create site-specific content assets to store the data for each country.

Q115. The Client has requested an Architect’s help in documenting the architectural approach to a new home page. The requirements provided by the business are:

* Multiple areas of static image content, some may need text shown at well

* The content page must be Realizable

* A carousel of featured products must be shown below a banner 101191

* Recommended categories will be featured based on the time of year

Which two solutions would fulfil these requirements?

Choose 2 answers
* Leverage B2C Commerce Content Management Service
* Leverage B2C Commerce locales in Business Manager
* Leverage B2C Commerce content slots and assets
* Leverage B2C Commerce Page Designer with a dynamic layout.

Q116. Which two activities should an Architect encourage the replication team to follow based on S2C Commerce best practices?

Choose 2 answers
* Use the undo replication process to roll back to the previous replication if necessary.
* Replicate the latest data to Production during periods of increased site use to ensure freshness.
* Use the undo replication process to roll back code replications only, not data replications.
* Wait 15 minutes after the recreation process completes for the cache to dear automatically.

Q117. Which three configuration does a developer need to ensure to have a new product visible in the Storefront?

Choose 3 answers
* The product has a Price
* The Storefront catalog that contains the product is assigned to a site
* The product has a master product
* The product is online and searchable
* The search index is built.

Q118. A Digital Developer extends a system object, Product, and adds a Boolean attribute, “sellable,” to it.

Assuming “prod” is the variable name handling the product, what code can the Developer use to access it?
* prod.extended.sellable
* prod.sellable
* prod.persistable.sellable
* prod.custom.sellable

Q119. Given the requirements:

* To show the washing instructions for a clothing product on a dedicated section the detail page

* Washing instructions come from the product information manager(PIM)

* To have this attribute available to localize in the Storefront.

Which action meets these requirements?
* Set the product system object type as localizable
* Add a resource file for every locale for which the attribute needs to be translated.
* Set the custom attribute as localizable
* Add a custom attribute for each locale

Q120. A merchant has asked their development team to add a new site.

Which two tasks are essential for correct site configuration prior to launch?

Choose 2 answers
* Assign a default payment processor.
* Assign a default payment method.
* Assign a default currency.
* Assign a default payment type.
* Assign the appropriate taxation type.

Q121. The Client wants to have a flash sate on a few products every day. These products are sold through B2C Commerce as well as an in store Point of Sale system that it tied to the same inventory.

An Architect analyzes the following proposed solution:

Inventory feed w*l continue to run daily but add a web-service call to compare and update B2C Commerce inventory in real time during checkout after a flash product’s inventory reaches a threshold.

Which two risks should the Architect communicate to the Client about this solution?

Choose 2 answers
* The default rate limiter configuration for the web-service could cause the web-service to return an exception during high traffic.
* If the externals hosted web-service is unreliable. It could be a point of failure in the site s order placement flow.
* If the product Inventory threshold that triggers the web service calls is reached too often. It will have a negative Impact on site performance.
* Because the job would still be configured to run daily there will be a degrade in performance during non-flash sales periods

Q122. A merchant has a new requirement to accept American Express credit cards on its Storefront. A credit card payment method

already exists.

Which step must a developer take in Business Manager to achieve this?
* In Payment Methods, enable American Express as a credit card type.
* Add American Express into the Order settings in Site Preferences.
* In Payment Processor, create American Express as a payment type.
* Add American Express as a Payment Preference in Site Preferences.

Q123. A client has two B2C Commerce sites in the same instance: one for the U.S. market, the other for the European market. They offer free gift wrapping on a selection of products. For each order, five products can be wrapped in the U.S., but only three products can be wrapped in the European region.

How should a developer allow the merchant to independently adjust this number?
* Create a new custom preference by extending the Site Preference object type.
* Select the corresponding option in the system preference for Orders.
* Add a new Campaign using the Online Marketing section of the Business Manager.
* Configure a new localizable content slot with a market-specific value.

Q124. What happens if the log file size limit is reached in custom logging?
* Logging is suspended for the day.
* Logging is suspended for two hours.
* The log file is deleted and recreated from scratch.
* The log file rolls over and the last used log is overwritten.

Q125. There is a business requirement to allow a third-party warehouse management system to update the MySampte.com storefront product inventory in real time. The architect decided that this is most easily accomplished by using the Open Commerce API (OCAPI). The developer needs to test the OCAPI settings m their sandbox. Assume the client ID for testing is "aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa'. What B the correct GCAPI setting for this?

A)

* Option A

Q126. What happens if the log file size limit is reached in custom logging?

* Logging is suspended for two hours.
* The log file rolls over and the last used log is overwritten.
* The log file is deleted and recreated from scratch.
* Logging is suspended for the day.

Q127. A Digital Developer noticed that cartridges in their workspace are NOT executing. The Developer confirms that the cartridges are uploaded to the B2C Commerce server connection’s target version directory.

Which action potentially solves this problem?
* Set the active code version to use the latest compatibility mode.
* Remove invalid characters from cartridge file and folder names.
* Set the server connection’s target version directory to the active code version.
* Remove invalid characters from the code version’s name.

Q128. a B2C Commerce developer has Implemented a job that connects to an SFTP, loops through a specific number of .csv rtes. and Generates a generic mapping for every file. In order to keep track of the mappings imported, if a generic mapping is created successfully, a custom object instance w created with the .csv file name. After running the job in the Development instance, the developer checks the Custom Objects m Business Manager and notices there Isn’t a Custom Object for each csv file that was on SFTP.

What are two possible reasons that some generic mappings were not created? Choose 2 answers
* The maximum number of generic mappings was reached.
* The generic mappings definition need to be replicated from Staging before running the job.
* Invalid format in one or more of the .csv files.
* The job needs to run on Staging and then replicate the generic mappings and custom objects on Development

Q129. A Digital Developer extends a system object, Product, and adds a Boolean attribute, “sellable,” to it.

Assuming “prod” is the variable name handling the product, what code can the Developer use to access it?
* prod.sellable
* prod.persistable.sellable
* prod.custom.sellable
* prod.extended.sellable

Q130. A developer has custom debug statements in a script, but the messages are not showing up in the Storefront Toolkit Request Log.

Which step needs to be completed to get the messages to appear in the Request Log?
* In Global preferences, check the box for Enable custom logging in Request Log.
* In Site Preferences, check the box for Enable custom Logging in Request Log
* In Custom Log Settings, check the DEBUG box for Select Log Levels Written to Files.
* In custom Log Settings, activate the loggin category at DEBUG level.

Q131. A Digital Developer must resolve a performance issue with product tiles. The Developer determines that the product tiles are NOT being cached for a long enough period.

Which two methods can the Developer use to verify the cache settings for the product tiles? (Choose two.)
* Enable cache information in the storefront toolkit and view the cache information for the product tile.
* View the cache information provided by the Merchant Tools > Technical Reports Business Manager module.
* View the product list page cache settings provided in the Administration > Manage Sites Business Manager module.

* Enable the template debugger to verify the cache times for the producttile.isml template.

Q132. A retailer notices that the Account Addresses page is showing the wrong shopper's address.

Which tool should the developer start with to identify the issue?
* Pipeline profiler
* Code Profiler
* Storefront Toolkit
* Reports and Dashboards Module

Q133. A developer has the following files in template/resources:

account.proierties

weight.unit=kilos

account_en.propierties

weight.unit=stones

account_en_US.propierties

weight.unit= pounds

Using the default locale configuration, what is the current outcome of the page that renders the account.isml template snippet below when visiting the Sofrefront with the English for Canada(en_CA) locale= Your parcel weighs 10 ${Resource.msg('weight.unit','account')}
* Your parcel weighs 10 stones.
* Your parcel weighs 10 pounds.
* Your parcel weighs 10 undefined.
* Your parcel weighs 10 kilos

Q134. A merchant wants customers to be able to order gift vouchers via their site. Since they can issue an unlimited number of these digital vouchers, this item should be available to sell at all items.

How can a developer use Business Manager to ensure that the gift vouchers are always available?
* Check the perpetual flag in the product inventory record
* Check the Available to Sell (ATS) flag dor the producto set
* Set StockLevel = maxAllocation for the producto.
* Manually set the inventory to a high number.
