* 256 GB
* 512 GB
* 427 GB

QUESTION 28

Which hardware KPIs do you need to size before performing a tailored data center integration (TDI) installation for a productive
SAP HANA database system?

Note: There are 2 correct answers to this question.
* Network bandwidth for the storage zone
* Total disk space required for the log volume
* Persistent memory (PMEM) required for backups
* DRAM required for the static data memory area

QUESTION 29

You are checking and monitoring SAP HANA system replication

Which status indicates a temporary connection loss of the secondary system?
* Unknown
* Error
* Initializing
* Syncing

QUESTION 30

Which feature do you use to dynamically manage SAP HANA database workloads per client session?
* Workload classes
* Admission control
* Parallel execution of SQL statements
* Non-Uniform Memory Access (NUMA)

QUESTION 31

What is the correct sequence of the following four steps when you restart the SAP HANA database system?
* 1. Row tables are loaded into memory.

2. Column tables loaded

3. Open transaction are recovered.

4. Aborted transactions are rolled back

* 1. Row tables are loaded into memory.

2. Open transactions are recovered

3. Aborted transactions are rolled back

4. Column tables are loaded

* 1. Aborted transactions are rolled back

2. Open transactions are recovered

3. Row tables are loaded into memory.

4. Column tables are loaded

* 1. Aborted transactions are rolled back

2. Row tables are loaded into memory.

3. Open transactions are recovered.

4. Column tables are loaded

QUESTION 32
