Universal Containers (UC) has 200 distributors that use Partner Community Licenses.

Partners cannot see each other's data, but UC is also trying to give more visibility to certain individuals at a distributor. Which scalable solution would an architect recommend that will give users in the partner manager role access to all Case and Container records owned by other partner managers and partner users (but not the partner executive) at the same distributor?

- * Create Sharing sets.
- * Create a permission set granting the View All permission to Case and Container records.
- * Give Super User permission to the partner manager users.
- * Create ownership-based sharing rules for your distributors.

NEW QUESTION 73

Universal Containers (UC) has a custom Apex class that enforces a business process and updates opportunities. UC has noticed that fields with field level security permission of read only on certain users; profiles are being updated by this class.

How should the architect fix this problem?

- * Add With Sharing keyword to the class,
- * Put the code in an inner class that uses the With Sharing keyword.
- * Use the IsUpdateable() Apex method to test each field prior to allowing update.
- * Use the WITH SECURITY_ENFORCED keyword in the SOQL statement.

NEW QUESTION 74

Which two settings are available in profiles, but not permission sets?

Choose 2 answers.

- * Tab Settings
- * Record Types
- * Page Layout Assignments
- * Login Hours

NEW QUESTION 75

Universal Containers wants to create a way to store sensitive Invoice Data in Salesforce. A User who owns an Account should not see every Invoice, but only invoices that they or their subordinates own. Which two features should be considered during this solution implementation?

Choose 2 answers.

- * Deploy the Relationship between Accounts and the Invoices Object as Master-Detail.
- * Ensure that the Organization-Wide Default sharing for Invoices is set to Private.
- * Create a Workflow that populates the Invoice sharing object upon Insert.
- * Deploy the Relationship between Accounts and the Invoices Object as Lookup.

NEW QUESTION 76

If you want to create some logic that will share certain records in APEX code, you just have to create special records that will open access to the desired records. The aim is to create records of certain type, for example , all share objects for custom objects are named as

MyCustomObject__Share

NEW QUESTION 77

UniversalContainers(UC)servicerepsareassignedtoaprofilewhichhas;ViewAll;inCase object(Private OWD).To make sure service repshaveaccess toallrelevant information to attendtocustomerrequests, whichtwodetailsshouldasalesforceArchitectsconsider? Choose 2answers:

- * Service repswill be able to access all UC contactrecords if theyare controlled by parent.
- * Service reps will notbe able to access all UC contactrecords if theyare controlled by parent.
- * Servicerepswillbeable toaccessall the UC Accountrecordsdue to Implicit Sharing.
- * Service reps willnotbeable toaccessallthe UCAccountsrecordsbecause Account OWD is private.

NEW QUESTION 78

Cloud Kicks recently decided to change its role hierarchy.

After this change was deployed, multiple staff members at Cloud Kicks reported to management that they can now view reports that they do not own and should not have access to.

What should the Architect do to assess the cause of the issue?

- * While logged in as one of the staff members, navigate to their user record and inspect their profile and role membership.
- * While logged in as the System Administrator, navigate to a sample account and use the Sharing button to determine who has access.
- * While logged in as the one of the staff members, navigate to a sample account and use the Sharing button to determine who has access.
- * While logged in as the System Administrator, use the Field Accessibility Viewer to view a matrix of who has access to Accounts.

NEW QUESTION 79

Universal Containers is updating its Organization-Wide Sharing Settings for the Account Object from a

“Public Read/Write” model to a “Private” model, so that they can hide certain national accounts from sales reps and sales managers. These national accounts should only be accessible by sales directors and above.

Universal Container’s Role Hierarchy matches its organizational hierarchy. Which two options should the Architect consider when designing the solution? Choose 2 answers

- * Sales directors will need a sharing rule created so that they can see accounts owned by Sales Users.
- * National accounts must be owned by a user who is above the sales managers in the Role Hierarchy.
- * Apex managed sharing will have to be disabled for the account object to protect the national accounts.
- * If a sales rep is added to the Opportunity Team for a national account, they will gain access to account data.

NEW QUESTION 80

Universal Containers (UC) stores basic employee information in a custom Employee object (OWD -Public Read Only). There are a few sensitive fields that need restricted access (salary, grade level, last performance rating).

Other than field level security, what other options are available to make these fields accessible to the Human Resource team?

- * Create a new custom object with private OWD and Lookup relationship to Employee to store new restricted information.
- * Change OWD of Employee custom object to private and a Lookup self-relationship to store only new restricted information.
- * Create a new custom object controlled by parent and a Master-Detail relationship to Employee to store new restricted information.
- * There are no other option besides using field level security.

NEW QUESTION 81

Universal Containers would like to customize the security and sharing features of Salesforce Account Teams. They have decided to implement a Custom Account Team object. They would like the new enhancement to include all of the features of the existing account team, but also utilize Apex and Visualforce on the custom Account Team object.

Which two different approaches should the Architect consider when designing this enhancement?

Choose 2 answers

- * The need to synchronize the AccountTeamMember object with the Custom Account Team object data.
- * The need to maintain the Account_share object based upon the Custom Account Team object data.

- * The need to dynamically create Criteria-Based Sharing rules with Custom Account Team object data.
- * The need to customize Account screens in Visualforce, as the Account_share object cannot be maintained programmatically.

NEW QUESTION 82

The VP of Sales at Get Cloudy Consulting wants to give one sales member the ability to view other sales members's sales numbers as a point of comparison.

If a Private model is being used, which two permissions are needed to create a dashboard for this purpose?

(Choose two.)

- * Manage Custom Report Types
- * Customize Application
- * Manage Dashboards
- * View All Data

NEW QUESTION 83

What should a Salesforce architect recommend to make sure that users that gained access to a custom object record through Apex managed sharing do not lose access to it when its owner is changed?

- * Create specific Apex Sharing Reason for the custom object.
- * Use `runAs`; system method in Apex classes to enforce record visibility.
- * Use `With Sharing`; keyword to make sure record visibility will be considered.
- * Create a new record in `_Share` object with `RowCause` `Manual`;

NEW QUESTION 84

An External Object is created to show Invoices from an external accounting system. When viewing the External Object, a user should only access invoice records the user is authorized to see.

What two actions are required to achieve the above requirement? Choose 2 answers

- * Setup External Object to use OAuth to connect to the Accounting system.
- * Create an owner based sharing rule to grant visibility to the Invoice object.
- * Restrict access to data in the accounting system.
- * Grant access to the External Object to only the Account Manager profile.

NEW QUESTION 85

Jane, a support representative at Universal Containers, created a report to view all her open cases that have been created in the past 7 days and saved the report in the `Private Reports` folder.

Who can view and run the report?

- * The report owner and any users who have been given access to the `My Private Reports` folder
- * The report owner and anybody in the role hierarchy above the report owner
- * The report owner
- * The report owner and users with the `View All Data` permission

NEW QUESTION 86

Universal Containers has set the Org-Wide Sharing Default for Accounts to Private and has created some sharing rules to extend

access based on certain data access policies. An architect has been asked to review access to a certain set of key customer accounts. How might this review be conducted?

- * Export the Account Share table and review.
- * Run a Report on Sharing in the Admin Console.
- * Log in as each user and Run the All Accounts List View.
- * Use the Sharing button on each customer Account.
