- \* Negligence
- \* Breach of contract
- \* Conflict of interest
- \* Misrepresentation

#### **NEW QUESTION 45**

A team of game designers must decide if players whose game characters commit violent and unlawful acts should be rewarded. The team agrees that the acts are simulations, and the game will be rated for adult or mature audiences. One designer raises questions about how contributing to this work will reflect upon the team's moral character.

Which ethical theory does this represent?

- \* Deontology
- \* Virtue
- \* Consequentialism
- \* Relativism

#### **NEW QUESTION 46**

Which organization licenses software developers who implement safety and health software in the United States?

- \* National Society of Professional Engineers
- \* Accreditation Board for Engineering and Technology
- \* American Society for Engineering Education
- \* National Council of Examiners for Engineering and Surveying

#### **NEW QUESTION 47**

A company struggles to maintain project schedules with its current resource capacity. With a new set of corporate goals and restrictions on full-time hires, the company is considering adding contingent workers to help fill the gap.

What is a disadvantage of using contingent workers to support the company's goals?

- \* Any skills gained during employment will be lost to the company at the project's completion.
- \* Internal business process understanding will be minimal given the temporary nature of the workers.
- \* The company may require the same worker for other projects.
- \* The company does not have to provide benefits throughout the project's lifecycle.

#### **NEW QUESTION 48**

A hospital is struggling with adverse patient outcomes caused by avoidable medication errors. Many of these errors are due to illegible writing by the prescribing physician or incomplete data (or the prescribed medication and dose).

Which technology system reduces these errors?

- \* Computerized provider order entry
- \* Health information exchange
- \* Electronic medical record
- \* Clinical decision support

#### **NEW QUESTION 49**

Which ethical issue is Alliah Company engaging in by signing the deal with Endothon Company and ceasing activities with Quiet Flag Industries?

- \* Computer fraud
- \* Misrepresentation
- \* Breach of contract
- \* Conflict of interest

#### **NEW QUESTION 50**

A company is bidding on a website project for a prospective client. The company knows that the client is going to weigh the time to deliver the project as one of its primary decision factors. The client has advised all bidders that completion time should be no more than three months with a budget of \$50,000.

The company knows that with its current resourcing, it cannot complete the project in less than four months.

However, it is confident that it will be able to deliver within four months to a high-quality standard and 20% under the set budget. The company advises the client that it would need four months but would be able to complete the project under budget.

What is this behavior considered?

- \* Ethical and illegal
- \* Unethical and illegal
- \* Unethical and legal
- \* Ethical and legal

#### **NEW QUESTION 51**

An incident handler discovers an unauthorized change in the security key vault's database file, which caused a disclosure of confidential information. Which ethical issue does this incident pose?

- \* Property
- \* Privacy
- \* Access
- \* Accuracy

#### **NEW QUESTION 52**

To gather data for improved customer profiles, a social media platform uses microphone data from its users in the United States. Which U.S. Constitutional amendment does this action violate?

- \* Third Amendment
- \* Fourth Amendment
- \* Second Amendment
- \* First Amendment

#### **NEW QUESTION 53**

An internet company develops a search engine to index websites and documents published online. The index displays short excerpts from search results in response to queries. Many of the indexed sites and documents are copyrighted.

Which doctrine covers the company's employment and reproduction of these materials?

- \* Safe harbor
- \* First sale
- \* Derivative work
- \* Fair use

#### **NEW QUESTION 54**

An organization plans to hire three external software engineers to build client software to connect its lightweight wireless devices to the cloud. It will do so according to specific terms and a specific duration defined in a legal document. The duration of the work will be six months.

Which workforce category should the organization hire within?

- \* Full-time employees
- \* In-house expertise
- \* Part-time salaried workers
- \* Independent contractors

### NEW QUESTION 55

A robotics company engages an IT firm to deliver a marketing software solution. During the project, the robotics company asks for additional features that were not in the initial contract. The IT firm's project leader is unsure whether it can deliver these features but verbally agrees to the scope change. On delivery, the robotics company notes that several of the additional features are not included and that because of this, the solution is not compatible with certain legacy systems the company did not initially disclose.

Which factor might have mitigated the problem if the IT firm's project leader had abided by a professional code of ethics?

- \* Minimizing scope creep requests from the customer
- \* Improving decision-making around agreeing to additional scopes
- \* Avoiding the delivery of an incompatible solution
- \* Understanding the legal implications of noncontractual agreements

### NEW QUESTION 56

What is the first step in ethical decision-making for an IT professional?

- \* Choose an alternative
- \* Develop a problem statement
- \* Implement a solution
- \* Identify alternatives

### NEW QUESTION 57

A tech worker's computer acts abnormally shortly after the worker starts their shift. The computer is up-to-date on all relevant patches and updates. The installed antivirus software has not identified any malicious code. During the investigation, the worker discovers that an attacker compromised the system, even though the worker did not engage in any behavior that could have introduced a virus or other external malicious software into the computer.

Which method of attack was used to compromise the worker's machine?

- \* Blended threat
- \* Trojan horse
- \* Spear phishing
- \* Zero-day exploit

### NEW QUESTION 58

A chief financial officer (CFO) at a major telecommunications company decides to replace a high number of its customer-facing stores with artificial intelligence-enabled telecom booths. The telecom booths will enable current or new subscribers to buy or replace SIM cards or mobile phones on the go. The CFO is concerned about a major reduction in the workforce but believes this move will help grow the company's subscriber base, reduce customer churn, and increase overall company profits.

Which ethical theory does this approach represent?

- \* Deontology
- \* Care
- \* Consequentialism
- \* Virtue

### NEW QUESTION 59

The retail store manager of a telecommunications service provider has been manually entering the data record of device returns into the company's device database every time a subscriber swaps their old phone for a new one. A recent internal audit revealed that several device records are missing from the device database.

Which aspect of data management should the store employ to avoid this situation?

- \* Encryption
- \* Collection
- \* Availability
- \* Accuracy

### **NEW QUESTION 60**

A consulting company employs H-1B workers. Even though companies applying for H-1B visas must offer a wage that is at least 95% of the average salary for the occupation, a close review of salaries within the consulting firm suggests that its H-1B workers are often paid 20% less on average than those with similar skill sets.

Which loophole is the company using to avoid paying H-1B workers a fair wage?

- \* Laying off employees with U.S. citizenship to lower the average salary numbers
- \* Classifying an H-1B worker as entry level when they fill a position of an experienced worker
- \* Pressuring H-1B workers to file petitions with the government to allow lower salary
- \* Employing H-1 B workers to work remotely from countries where the cost of living is lower
