

[UPDATED 2025 Fortinet FCP_ZCS_AD-7.4 Questions Prepare with Free Demo of PDF [Q16-Q30]

[UPDATED 2025] Fortinet FCP_ZCS_AD-7.4 Questions Prepare with Free Demo of PDF
NEW 2025 Certification Sample Questions FCP_ZCS_AD-7.4 Dumps & Practice Exam

NO.16 Which component is essential for managing distributed applications across multiple Azure services?

Response:

- * Azure DevOps
- * Azure Active Directory
- * Azure Logic Apps
- * Azure Service Fabric

NO.17 Azure public cloud offers which of the following benefits over traditional data center deployments?

Response:

- * Higher initial capital costs
- * Reduced operational flexibility
- * Scalability on demand
- * Longer deployment cycles

NO.18 What capabilities does Azure Virtual WAN offer?

(Choose Three)

Response:

- * Centralized network and policy management
- * Direct on-premises connection via private links
- * Automated route management across VPN, ExpressRoute, and Azure connections
- * Integrated security with native firewalls and security controls
- * Reduced latency for Azure services

NO.19 What type of Azure networking element enables you to securely connect Azure virtual networks to each other?

Response:

- * Azure ExpressRoute
- * Azure Virtual Network
- * Azure VPN Gateway
- * Network Security Groups (NSGs)

NO.20 Which feature of Azure supports real-time scalability and high availability of applications?

Response:

- * Azure Functions
- * Azure Logic Apps
- * Azure Load Balancer
- * Azure Blob Storage

NO.21 What is the purpose of Azure Application Gateway in the context of application security?

Response:

- * To serve as a cloud-based firewall
- * To provide SSL termination
- * To route traffic based on source IP address
- * To manage API calls across multiple platforms

NO.22 Which feature of Azure Security Center helps in identifying and reacting to threats across Azure and hybrid environments?

Response:

- * Custom alert rules
- * Advanced threat protection
- * Security score
- * Regulatory compliance dashboards

NO.23 Which Azure service is integral for detecting and responding to security threats on Azure virtual machines?

Response:

- * Azure Monitor
- * Azure Defender
- * Azure Policy
- * Azure Advisor

NO.24 How does Azure Firewall contribute to your network's security architecture?

Response:

- * By providing shared access signatures
- * By filtering incoming and outgoing network traffic based on defined security rules
- * By managing virtual network connections
- * By offering content delivery network services

NO.25 How does autoscaling enhance HA for applications hosted in Azure?

Response:

- * By automatically adjusting the bandwidth
- * By adding or removing resources based on demand
- * By shifting traffic to underutilized servers
- * By encrypting data transfers

NO.26 What primary security function does FortiWeb serve when deployed in Azure?

Response:

- * Network traffic management
- * Web application firewall
- * Email security
- * Intrusion detection system

NO.27 What does the deployment of a FortiGate instance in Azure typically protect?

Response:

- * Only the data at rest
- * The entire network infrastructure
- * Only outbound traffic
- * Application deployment scripts

NO.28 What does configuring HA using FortiGate in Azure primarily safeguard against?

Response:

- * SQL injection attacks
- * Physical hardware failures
- * Phishing attempts
- * Unauthorized data access

NO.29 What is the primary benefit of configuring HA with FortiGate in an Azure environment?

Response:

- * Enhanced data encryption

- * Reduced data storage costs
- * Increased application performance
- * Failover protection

NO.30 What advantages does deploying Azure Virtual WAN bring to a multi-regional organization?

(Choose Two)

Response:

- * Improved global reach to Azure services
- * Lower overall network latency
- * Simplified patch management
- * Enhanced local security on physical devices
